

Jain Tools and Dies Addition of a New Injection Moulding Machine

The Shibaura Machines (formerly TOSHIBA MACHINE)- TS150/510 - 600 joins an already expansive set of tooling machines at the Jain Tools and Dies tool room.

Haryana, Gurgaon, Feb 20, 2021 ([Issuewire.com](https://www.issuewire.com)) - - The Shibaura Machines (formerly TOSHIBA MACHINE)- TS150/510 - 600 joins an already expansive set of tooling machines at the Jain Tools and Dies tool room.

Jain Tools and Dies, an ISO-certified company that belongs to a 40-year-old group of companies recently announced the addition of Shibaura - TS150/510 - 600 (formerly TOSHIBA MACHINE), an injection moulding machine to its tool room in Manesar. The recent addition will help the company increase its output of high-quality plastic mould products with precision & speed. The TS150/510 - 600 machine ranks amongst the leading high-end plastics injection moulding machines globally.

Speaking on the announcement, an executive at Jain Tools said,
"With a focus on the future, We keep investing to make our tool room flexible and diverse in terms of machinery.

This new edition of the Shibaura injection moulding machine to our tool room will help us in keeping up with the trends and keep delivering perfection with consistency, a high degree of integration, and a high level of performance from every mould we make."

The hydraulic injection moulding machine belongs to the Shibaura Machine TS Series that offers a five-point twin toggle clamping mechanism, a robust injection unit, a user-friendly LNC6 control system, and closed-loop servo hydraulics. The TS150 has a clamping force of 150 tons and has three operation modes - Automatic, Semi-Automatic, Manual. The machine also comes with a robust construction of injection units and a modular concept in selecting injection units offering a high degree of flexibility. The machine's drive unit has meager power consumption due to a reliable combination of servo pump, drive, and servo-motor.

Established in 2007, Jain Tools and Dies is a part of a 40-year-old group of companies and counts Maruti Suzuki, Honda Cars, Honda Motorcycles, Hero Moto Corp, FCC India, Denso, etc. amongst its hundreds of clients. Jain tools and Dies specialises in Design, Development and Manufacturing of High Pressure Casting Dies, Plastic injection moulds, Blow Moulds, Rotational Moulds, Zinc Casting Dies, Trimming Tools, Fixtures and Loose inserts of dies for Automobile, Tungsten Carbide Dies For Wire & Fastener Industries and parts for various other engineering industries. The company takes all measures to reduce its carbon imprint and takes pride in providing value-added Tooling Solutions in an environmentally sustainable manner.
