

Jindal Biotech Private Limited inks INR 20 Crores deal with Cure21 Biosciences

MoU signed between both the companies is for over INR 20 Crores, spread over the next few years.

Madhya Pradesh, Indore, Feb 21, 2021 (IssueWire.com) - Jindal Biotech Pvt Ltd (JBPL) and Cure21 Biosciences Pvt. Ltd. are pleased to announce that they have entered into a strategic alliance, combining JBPL's products across Medical Cotton, Dressings and Bandages with Cure21 Bioscience's footprint in Madhya Pradesh, to meet the ever-growing requirements of quality medical and surgical consumables in these regions. The first phase to stem from this partnership will be implemented in selected districts of Madhya Pradesh including Indore.

Whilst the treatment of wounds developed rapidly in the latter part of the twentieth century and continues to do so today, there is and will be a continuing growing need for the apparently simple dressing and bandages such as gauze based dressings, medical tapes, bandages, for use as absorbents and packing in operative procedures, wound cleansing and general patient care.

JBPL - Cure21 alliance is a growth opportunity for both companies. By providing our products through Cure21's distribution system in Madhya Pradesh, it will help transform hospitals, nursing homes, and medical colleges with access to quality medical and surgical consumables", said Dr. Chetan.

"In line with JBPL's core focus, the partnership with Cure21 would expand JBPL's footprint to cover the entire region of Madhya Pradesh. The synergies created by combining Cure21's local network with JBPL's medical and surgical consumables' products open new horizons for both the businesses to

address the needs of healthcare markets for quality products,” added Mr. Vishal.
