

Matellio Presents Gift of Love and Care to Its Employees During Pandemic

Rajasthan, Jaipur, Feb 19, 2021 ([Issuewire.com](https://www.issuewire.com)) - When the whole world is trying to combat the ongoing pandemic situation, Matellio has gone one extra step to secure and protect the employees and their loved ones during pandemic situations. The leading software engineering firm presented one of the best healthcare gifts to its employees, a complimentary mediclaim policy.

Right from healthcare consultation to maternity benefits, Matellio's healthcare policy has made sure that the complete hospitalization process becomes smooth and accessible for every employee and their family members. Apart from the basic amenities, the policy also covers some advanced benefits for the employees like air ambulance services, waiver of 30 days waiting period, instant payments, pre/post-hospitalization charges, coverage on pre-existing diseases, and much more.

Talking about this healthcare present, the main aim of Matellio is always to provide the best to its employees, and that's what became the base of this policy. That's why, along with all the 200+ employees, the company has extended the voluntary mediclaim policy to the employees' spouse and kids to maintain employee well-being. Not only that but with this mediclaim policy, the employees can even avail cashless facilities at over 7000+ hospitals across India.

"In today's pandemic situation, it is extremely crucial to ensure the complete well-being of all our employees and their family as a whole. So, to give them better healthcare facilities, this healthcare policy has been introduced. With this mediclaim policy, the employees need no longer have to worry about huge medical expenses. Our group mediclaim policy has been topped with claims up to INR 5 Lacs for both the employees and their family members", Puneet Rao, Chief Operating Officer, Matellio.

The company also distributed care packages to all their employees and conducted various precautionary sessions during pandemics to mitigate their physical and mental health issues.

"Instead of laying off employees, we engaged them in different work so that Matellio can use all resources optimally, and later when normal conditions prevail, they can get back to their normal work. That helped us achieve our vision, i.e. to provide the best to our employees," Reena Bhansali, VP HR, Matellio.

About Matellio

[Matellio](#) is a bespoke software engineering services company offering digital transformation and development services using a unique hybrid development model.
