

# MWC 2021: ZHAOWEI Drive Systems Empower Digital Ecosystems

**China, Shanghai, Feb 5, 2021 ([Issuewire.com](http://Issuewire.com))** - [ZHAOWEI Drive](#) has confirmed to attend Mobile World Congress 2021 (MWC21) Shanghai. It is a three-day physical event also featuring a virtual platform for the first time, broadening the reach of its main Asia conference. Billed under the Connected Impact theme, it runs from 23 to 25 February at Shanghai New International Expo Centre (SNIEC).

MWC is an annual trade show organized by GSM Association, dedicated primarily to the mobile communications industry. MWC21 Shanghai is far more than just an event. It is a celebration of the power of intelligent connectivity and provides a platform for people to come together and push the industry and society forward. Major exhibitors include Huawei, ZTE, LG, etc. Attendees to MWC Shanghai 2021 will experience a series of breakthroughs in technology covering 5G, AI, IoT, smart home, and more. As one of the exhibitors, ZHAOWEI (Booth: N2-D108, Stock Code: 003021) will showcase its powerful micro-drive technology towards digital ecosystems and a portfolio of [drive systems](#) ranging from 3.4mm to 45mm.

Featuring a precision, high torque, and compact size, gear motors provided by ZHAOWEI have gained much popularity. In an ever-changing world, it takes flexibility and adaptability to shape the future. While dedicated to improving intelligence in various fields to a higher level, ZHAOWEI is always on the road to pushing gear drive technology forward with great innovation and persistence. At MWC21, ZHAOWEI is expected to unlock the full power of connectivity with the appealing package including high-performance PMDC, brushed/brushless DC, stepper motors as well as planetary gearheads, encoders and drive electronics assemblies for constructing complete drive systems so that people, industry, and society thrive. There are various highlights, including but not limited to:

- Drive system for pan-tilt heads that promotes 360° free rotation and responsive positioning
- Drive system for mobile phones that helps to flexibly place the front camera and keep in line with the era of full-screen phone
- Drive system for TV pop-up cameras that realizes the intelligent hiding or opening of the TV

camera, thus facilitating TV manufacturers usher in a new era of smart TV

- Drive system for VR headsets that achieves positional tracking and accurately adjusts the proper position of the distance between the pupils and the focal length with a small amount of power

Integrating creativity and adhering to the philosophy of customer satisfaction, ZHAOWEI Drive continues to focus on both product performance and appearance. Tailor-made drive systems are accessible for different fields consistently on-time and to-spec.

“Every sector is undergoing deep transformation, and connected progress will stimulate global recovery and help us overcome the effects of the pandemic. Luckily, MWC 2021 creates a chance to explore how digital ecosystems can lead the global recovery by encouraging connections between exhibitors like us and audiences from around the world,” said the Director of ZHAOWEI. “Come to browse our drive systems and chat with our technical engineers. Welcome to our booth (Booth: N2-D108). We sincerely invite you to witness our varieties and innovations.”
