Annemarie says as to why she wrote the song. "Too many people discriminate against others because they are different. We were all innocent when we were born. Racism, hate, and greed are learned, and to make a positive change, we must question our own character and choose love and peace in this world."

The lyrics in "Color Blind" use love, kindness, hate, and greed as metaphors to describe "human colors" as one's outwards appearance does not reflect one value or being in this massive world. The lyrics emphasize the adage of not judging a book by its cover, and to dig deep and examine people's hearts and minds instead. They also encourage us to love, make change through kindness, and accept diversity in our society.
