In order to access all the latest and advanced features of Microsoft Office, please visit the link "www.office.com/setup" and get the product now.

Process for Downloading MS Office on Windows PC and Mac

Here's how to download Microsoft Office on Windows PC and Mac computer:

- First of all, turn on your computer system and launch any web browser on it.
- And now, navigate to the website "office.com/setup."

- After reaching the next screen, click on the option of “Sign in” in case you are logged out of your Microsoft account. And enter all the credentials to log in. You can also choose to sign in with any type of account that you wish to link with Microsoft Office. You can use your work, Microsoft, or school account.
- If you are logging in with your work or school account, then firstly, head to the Microsoft Office homepage and then click on “Microsoft Office” to start the installation process.
- If you are signing in with your Microsoft account, get to the Office homepage first and then hit the “Install Office” option. And again, click on the option of “Install.”
- And after following the appropriate steps, the Microsoft Office setup file will now start to download on your PC.

Activating MS Office on Windows

Here are the steps for activating MS Office on a Windows computer:

- To activate the MS Office on a Windows PC, first of all, go to the “Start” icon and then search for any Office apps using the search bar. For instance, you can search for the “Powerpoint” app.
- Now, click on the app icon from the appearing search results.
- And now, you will see a license agreement window on your screen. Read all the terms and conditions and then hit the “Agree” button. And this way, Office will get activated on your system.
