

Quantum Corp-Health Launches Parental Health Care Initiative For Indians In USA!

Texas, Texas City, Feb 24, 2021 ([Issuewire.com](https://www.issuewire.com)) - Quantum Corp-Health, a Mumbai-based leading health management company in India, announced its new venture Quantum Health Manager (QHM). Quantum is involved in medical check-ups and follow-up care for corporate giants in India and now bringing the same expertise to parental health care.

Quantum's CEO Dr. Vankar explains: 'In last 2 decades many Indian professionals settled in the US. Their parents are now getting old and face health-care issues alone. `Quantum Health Manager is a concierge service led by medical professionals to support them. QHM will serve them through a 24/7 helpline, online doctor consultation, doctor consultation, and lab tests at home. Emergency health care assistant, too.'

He adds, 'The preventive care and continuous monitoring of health symptoms can add up to 10 years of active life span to the elderly. And if any emergency occurs, quick medical intervention and hospitalization save lives. Many times the difference between life and death is half an hour delay of medical support.'

The service is available now in all towns and corners of India. This is the first of its kind parental

healthcare initiative at this scale in India. Led by medical professionals and backed by a team of 200 Quantum employees, a nationwide network of pathology labs, post-procedural paramedic support, and specialist doctors.

The need for such a solution was felt for a long time. The story of lonely parents suffering alone while their sons and daughters are far away in foreign lands is a regular feature in the Indian news and social media.

Dr. Bhavya, Parent care specialist at Quantum, says, 'Old people, especially when alone, are insecure. And it needs a caring approach. That's why we are putting special emphasis on empathy-based communication with the parents of our clients. To give you an example, our health managers talk to them slowly, and in their language. That makes a big difference.'

Pankaj Shah, Director of technology informs--We have created a robust communication platform for our clients and their parents. The medical history of parents will be available with a click, on the web as well as a smartphone. QHM became possible because of close involvement of experts from medical health care, empathy-based communication, and technology platforms.'

Dr. Vankar concludes, 'preventive care can add more than a decade to aging people. And it increases the confidence of old people when they know someone is there to support them even at midnight!'
