

Singapore's Leading Talent and Labour Analytics Company Collaborates with Boston Consulting Group on RISE

Singapore, Singapore, Feb 3, 2021 ([Issuewire.com](https://www.issuewire.com)) - Singapore's Leading Talent and Labour Analytics Company Collaborates with Boston Consulting Group on RISE

JobTech Pte Ltd (JobTech), Singapore's leading talent and labour analytics company, is collaborating with Boston Consulting Group to upskill 1,000 people under a 6 month structured programme called RISE (Rapid & Immersive Skill Enhancement).

RISE is developed by Boston Consulting Group, under SGUnited Mid-Career Pathways Programme. The programme is designed to build a high-demand business and digital skills. Placement assistance is also provided.

Participants will see a step change in their employability, through an experiential learning programme that taps into the rich experience and learning ecosystem of BCG and the capabilities of JobTech platform.

"We are excited to be working with BCG on RISE," said Mr Ang Wee Tiong, CEO of JobTech. "The outbreak of COVID-19 has caused many industries to be disrupted and created opportunities for digital transformation. A curriculum that is designed based on real market insights is crucial in producing a competitive workforce that is in step with global digital transformation trends".

JobTech's is Singapore's leading talent and labour analytics company. JobTech's big data is used in national-level industry transformation roadmaps by global consultancy firms. Prior to its collaboration with BCG RISE, JobTech has already collaborated with major enterprises, government and education institution to address various labour market inefficiencies, ranging from recruitment, learning and development, to internal mobility.

Some of JobTech's innovation partnerships include CBRE, Korn Ferry, Ernst & Young and Asian Development Bank.

The company's Artificial Intelligence powered platform has analysed more than 1 billion jobs across 144 countries to generate an accurate, real-time and predictive analysis of skillset requirements for

tomorrow's workforce. Such data-driven insights help companies strategically plan their human capital investments and guide education institutions in shaping their curriculum.

The RISE programme, by BCG Digital Academy, is officially launched with the first cohort starting in Jan 2021, and more details can be found at contact@bcg-rise.com, or call +65 6372 8707.
