

SplashLearn Announces ‘SpringBoard Math Challenge 2021’

Opportunity for classrooms to collaborate and compete; Prizes worth more than \$20,000 up for grabs

California, San Francisco, Feb 27, 2021 ([Issuewire.com](https://www.issuewire.com)) - The popular game-based learning program SplashLearn announced the 7th edition of its massively popular [SpringBoard Math Challenge today](#). The math competition is a calendar marked event and is highly anticipated by teachers across the US and Canada. SpringBoard Math Challenge 2021, open to all classes from grade 1 to grade 5, will run from March 1 - May 9, 2021.

“SpringBoard is unique because it brings students together in an environment that enables competition as well as collaboration. This year, it assumes a new meaning as different classes compete with each other but are also coming together, learning together while also having fun - something they haven’t been able to do this year,” said **Joy Deep Nath, Co-founder, SplashLearn**.

After creating an account on SplashLearn, teachers can enroll their classes for SpringBoard 2021. Once enrolled, all the math problems the students solve will earn them points, which will count towards the total class score. The best performing classes with the highest points win weekly prizes at both the state and national level. The grand winners will be announced at the end of SpringBoard. Prizes worth more than \$20,000 are up for grabs this year.

“It is crucial that children don’t fall behind with math during this period of school closures. The SpringBoard will help reduce the attainment gap, providing children with a fun and secure way to

practice with their peers!” said **Arpit Jain, CEO and Co-founder, SplashLearn**, “I wish every school the greatest success and every child happy learning”.

Catering to grades PreK through grade 5, the SplashLearn program is available free-of-charge to all schools and teachers in the US and Canada. It is designed to give teachers and schools the opportunity to engage their elementary school students through fun math challenges aligned to the Common-Core curriculum. The 10-week challenge will allow students to master their math skills and enter the new class with confidence, whilst having fun throughout the process.

The math content covers more than 570 skills through 2,376 activities and games. **The registration for teachers and entry to the competition is already open. Teachers can sign up for the SpringBoard Math Challenge 2021 by [visiting this page](#).**
