

Tri-State's Leading Window Film Installation Company – U.S. Film Crew

U.S. Film Crew – Window Film Installation Company

Your Trusted WINDOW FILM Resource

Pennsylvania, Pittsburgh, Feb 2, 2021 ([Issuewire.com](https://www.issuewire.com)) - U.S. Film Crew is proud to serve Western Pennsylvania, Eastern Ohio, Northern West Virginia, and other surrounding areas with professional window film installation services. They provide a wide array of services, including solar, security, decorative, and specialty window tint installation services for residential and commercial properties. Their certified professionals have been extensively trained in multiple installation techniques and have

passed many different federal background checks, so customers have no need to worry about a less than the spectacular outcome.

With three decades of experience, U.S. Film Crew prides itself on providing trust and confidence to customers by offering the highest quality of products and customer services from start to finish.

Their experts assist customers to find the ideal solution for their home or office, whether it be adding protection against fading or glare in a home, or to add decorative branding in an office space.

History:

Glenn Yocca, Founder & chief executive officer (CEO), launched a Pittsburgh based automotive tint and detailing company, Yocca Brothers Auto Spit Shine in 1992, which began the journey to U.S. Film Crew. Glenn, a self taught entrepreneur with substantial business acumen and drive, noticed a significant opportunity to grow his business into a residential and commercial window film market. Yocca Brothers Auto Spit Shine made the transitions into becoming *Sun Solutions*.

Glenn accommodated the Pittsburgh market, installing window films on commercial and residential properties. He perfected the different aspects of the growing window film business, from using the best window film products down to the most efficient installation methods.

After the events of 9/11 created a high demand for security film, Glenn was invited to participate in a project in Washington D.C. It was during that time where he saw a need in the industry and decided to create a new niche providing expert project management and labor for hire to the window film industry. Thus U.S. Film Crew was born.

The organization gained a respected status as the most capable, efficient and trusted installation team in the country completing projects nationally & beyond at Amazon, the International Monetary Fund headquarters, EA Sports headquarters, and the Empire State Building.

In 2016 Glenn decided to use the expertise and experience acquired to serve his hometown Pittsburgh market as a business-to-business (B2B) and business-to-consumer (B2C) window film dealer. U.S. Film Crew offers high quality window film and installation to residential and commercial customers.

Today, the company is established as the Tri-State's most reliable and trusted window film dealer.

Window Film Services:

Currently, U.S. Film Crew is offering four types of window film services to commercial and residential properties:

- **Decorative Window Film:** Decorative window film improves the look of glass with many different solutions. Rather than adding or replacing curtains or window blinds, this modern alternative provides something versatile and unique. A broad-spectrum product caters to different decor and style preferences. U.S. Film Crew provides top-notch decorative window film services and has an inclusive selection of decorative glass tinting films to choose from.
- **Solar Window Film:** Solar window film aims to lower the heat transferred through the glass, reduce glare and add protection from fading, making your space a more comfortable and safer environment. U.S. Film Crew has comprehensive experience in providing top notch window film

solutions for commercial and residential spaces.

- **Security Window Film:** S. Film Crew offers security window film services to their clients to protect their property from occurrences ranging from natural disasters to smash & grab situations. This service provides precious time to deter unwelcome people from entering the home or business.
- **Specialty Window Film:** S. Film Crew provides a broad spectrum of specialty window film products and installation services to residential and commercial customers. A few examples of the specialty films that are offered include Rear Projection Film, Anti-Fog Film, Anti-Graffiti Film, Bird Safety Window Film, Casper Cloaking Film, and Switchable Smart Glass.

Window Film Experts:

- **Glenn Yocca (Founder & President):** Glenn started his career in the automobile industry, tinting windows. He then jumped into the residential and commercial flat glass segment. His vibrant personality and can-do attitude allowed the company to become one of the most trusted and sought out window film companies in the country.
- **Jacquelyn Trejo (General Manager):** Jacquelyn has recently joined the team at U.S. Film Crew to ensure all processes not only run smoothly & efficiently but to enhance & build strategies to keep the company ahead of the curve. Her get it done attitude keeps everyone motivated and on track for continual growth.
- **Mark Yocca (Commercial Sales):** Mark's sales, project management, and design background have proven to be a significant asset within the commercial window film sector. His dedication to helping individuals and problem-solving skills enable him to offer creative solutions to clients.
- **Ton Van Dijk (Commercial Sales):** Ton made a leap from real estate to the window film industry a few years ago and has never looked back again. His real estate background has made him proficient in the understanding of commercial trends within the city, which in turn enables him to provide effective & forward-thinking solutions to his customers.
- **Karen Klinger (Administrator):** Karen is the do-everything member of U.S. Film Crew. She deals with policy development, contracts, invoicing agreements, payroll, and anything connected to human resources.
- **Weatherly Mattie (Director, Residential Sales):** Weatherly facilitates the residential sales division of the company, handling all inquiries & projects from start to finish.
- **Ryan Herda (Window Film Specialist):** Ryan is a professional window film expert and installer. He has immense expertise in both commercial and residential projects.
- **Tim Trejo (Window Film Specialist):** Tim is a 26-year veteran of the window film industry who has recently brought his skill and expertise to the U.S. Film Crew team. With his extensive knowledge & experience, he provides not only a great service to the company, but outstanding service to our customer's every time.
