

Uber clone - Launch a taxi booking app like Uber using our clone script

New York, New York City, Feb 11, 2021 ([Issuewire.com](https://www.issuewire.com)) - In the fast-paced, digitally-driven world, the way we perceive things has changed. Gone are the days where we used to wait for hours and had enough patience to avail of any service.

Considering this scenario, the way businesses run has tremendously changed. They prefer operating their business by using on-demand apps. Because the success of any business relies on not just initiating or gaining profit once, it has to be consistent and should have a loyal customer base.

Sustaining businesses in this competitive market are quite complicated without using mobile apps. They help you reach a global audience, thereby enabling you to turn high profits in no time.

We, as an experienced clone script development company, function according to the trend. We keep all our clone apps updated and deliver on time as everything is pre-built and readily-launchable.

We believe clients want everything on demand these days, and they spend most of their time on mobile more than ever. Mobile usage has literally surpassed traditional methods of approaching users and desktop usage. A shocking report from a legit source states that the average user checks their phone at least 46 times a day.

Go with the right choice - Inoru

Inoru is the leading clone app development company that helped many businesses by providing budget-friendly and highly interactive app development solutions. We help them sustain in their business sector by giving them robust clone apps. The best part is our clone scripts are updated based on the current

happenings in the market. This helps them to stand unique and stay updated in their sector.

Among all the clone apps, one of the widely and majorly used app scripts approached by businesses is the Uber clone app.

The sudden outbreak of a pandemic majorly affected businesses, even the giant company, Uber. It has seen a downfall as no rides were available due to the nationwide lockdown. But now, it has again started seeing a huge breakthrough due to the slight yet effective modifications they made in the app keeping safety precautions in mind.

We, as a clone app development company, updated our [Uber clone](#) according to the current pandemic situation. Here, we will jot down a few of the add-ons we included in our Uber clone.

With the gradual lifting of the lockdown restrictions due to Covid-19, there has been a steady improvement in ridership.

It is expected to increase to \$126 million by 2025, according to the records registered in CAGR of 16.5% from 2018 to 2025.

Safety measures we have included in our Uber clone

Due to the pandemic, most of the drivers had canceled many user's requests. To bring back the trust among them, we have added effective safety measures and changes ensuring safety for both parties.

The following are some of the safety measures we added in our Uber clone app post-COVID.

Keeping users updated

Due to the fear of the deadly coronavirus induced in every individual, many stopped using ride-hailing services. To overcome this, we included this feature by sending a message via push notification feature to the registered app users while booking a trip that the vehicles have been sanitized and freshly ventilated.

Face-mask scanner

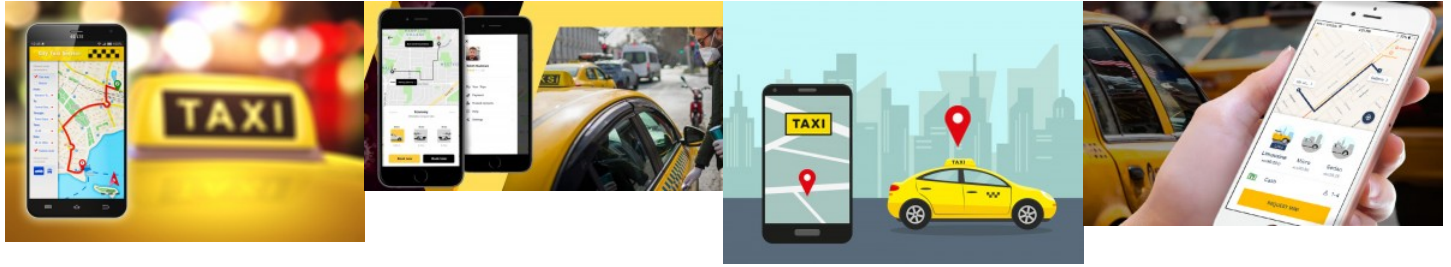

This feature ensures your users know whether the driver is wearing a mask or not before reaching their location. Using image-recognition technology incorporated in our Uber clone, users will know whether their drivers are wearing a mask or not.

Contactless payment

Considering both the rider and the driver's safety, we have integrated this safety feature in our Uber clone script. This contactless payment feature reduces the chances of the spread of the virus.

Summing Up

We understand the current scenario of businesses. We can help your business develop an [app like Uber](#) by launching an app with safety measures and updated features that will retain trust from users and riders, thereby allowing you to sustain in the market for the long run. Therefore, launch your Uber app using our impeccable clone script.
