

Will we "return to normal" or do we need to "return to normal"?

Kuzman announced his debut album titled "Collective Zero"

Georgia, Atlanta, Feb 17, 2021 ([Issuewire.com](https://www.issuewire.com)) - The Protagonist's guitarist Kuzman has today announced his debut album titled "Collective Zero"

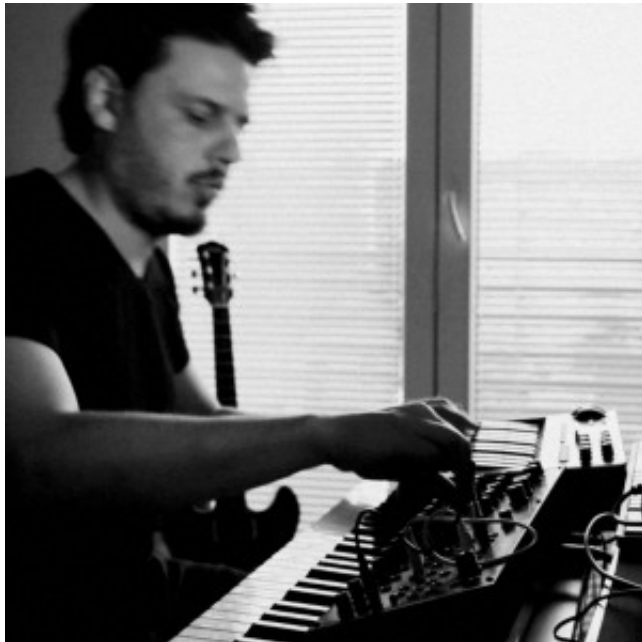

"Collective Zero" is Kuzman's first studio album and comes after two album releases with his Berlin-

based band The Protagonist and collaboration on a project "OLAL" with a legendary British producer Gareth Jones (Depeche Mode, Erasure, Yann Tiersen).

The album is entirely recorded and produced in his studio and the style ranges from classical and ambient to electro-psychedelic upbeat with gradually raising harmonies and profound atmospheres.

"Collective Zero" is a story about all of us, about the self-destruction of humankind. Composed during the lockdown, I tried to answer many questions that the pandemic has imposed in unexpected ways. Will we "return to normal" or do we need to "return to normal"?

Kuzman is a classically trained musician, based in Skopje, Macedonia. Co-founder of the band The Protagonist, guitarist in OLAL (Athens- Georgia), and known for his work on sound design for documentaries.
