

Blockchain-based Virtual Number platform REMIX app to reach tens of millions of consumers & retailers.

United Kingdom, London, Mar 8, 2021 ([Issuewire.com](https://www.issuewire.com)) - **REMIX** token is a BEP 20 based token created in Binance Smart Chain aiming to bridge between blockchain and telecommunication technology to focus on the fast-growing lucrative market.

London, March 6th 2021 - **REMIX.CAPITAL** a new venture kickstarted **REMIX** token which fuels the

entire **REMIX** network. Remix Token (RMX) is a utility- based cryptocurrency designed to be the gas and fuel of the **REMIX** Network platform. It has also released a white paper outlining further details of its token structure and confirming that it has planned to release its full functionality app on Q4 of 2022. A number of intended partnerships are set to be announced in the coming days, which will see the platform preinstalled on millions of smartphones.

Airdrop Event for BNB holders

If you hold BNB with exchange, Airdrop will be credited directly to the supported Exchanges. But If you're a Wallet user, you are also able to claim Airdrop tokens through Metamask, Trust Wallet or Binance Smart Chain Wallet. Users holding BNB in their accounts on the snapshot date (Yet to be announced) on Q2, 2021 will be automatically qualified to participate in the airdrop. There is no minimum balance required.

The amount of REMIX tokens you'll receive depends on how much BNB you have in your account at the snapshot time stated above. We have derived the following equation to distribute RMX proportionately.

RMX Airdrop = 50% supply of REMIX/Circulating supply of BNB

For example, if you hold 1BNB, you will receive approximately 0.0599 RMX of airdropped REMIX tokens to your Wallet that was holding BNB at the snapshot time.

With the REMIX token, customers will be able to purchase subscriptions and services available on REMIX network. RMX tokens are then used in-app to purchase virtual numbers, calling minutes and other subscriptions. Not only does this token quicken the transaction, and reduce the price of content, it also opens in app purchases to customers without access to traditional methods of payment. REMIX is powered by the Binance Smart Chain. It's optimized for ultra-fast trading. Binance Smart Chain (BSC) is best described as a blockchain that runs in parallel to the Binance Chain. Unlike Binance Chain, BSC boasts smart contract functionality and compatibility with Ethereum Virtual Machine – EVM. It has since become a leading smart contract deployment hub globally. The token-based REMIX app platform will give access to tens of millions of virtual numbers for businesses and app consumers who do not want to disclose their private phone number or want a second number for a business or any other purpose.

In contrast, RMX token payments will be made directly to the developer, and can then be exchanged for a BNB or FIAT currency (USD, EUR, GBP etc) at any time.

About REMIX app

REMIX Network is a Platform, based on blockchain technology, which is set to transform the telecommunication industry around the world. The app with the feature outlined functionalities to the users:

Call Forwarding

Never miss your call again. Forward Your Inbound Calls to your existing phone number as per your availability. Unattended calls are directly forwarded to Voicemail.

Realtime Recording

Never miss your important conversations. Listen to all your inbound and outbound calls with a realtime recording option from anywhere at any time.

Get Global in Seconds

Connect with anyone locally with virtual numbers. Create your local presence and expand your communications anywhere in the world.

Secure & Transparent

AT-TLS is performing encryption or decryption of all Calls. Payments are cryptographically secured on a ledger and transactions are distributed across a network, with data recorded and validated in a blockchain.

Fast & Efficient

Obtain the number of your choice. Ready to use virtual numbers provide you an option to choose a number of your choice from our pools, available to use in seconds. It's fast and efficient to manage your numbers in one place.
