- **If you prefer a safer type of trade, you can wait for the signal confirmation and enter the trade when the second arrow (small) appears on the screen, confirming the trend direction.**
- **Special wow-feature: you can enter at the same time both at the first signal and at additional signals when the indicator detects extra entry points, that is entering every**

time a new arrow appears on the screen. Thus, instead of one winning trade, you can have as many as three!

- **Moreover, you can also enable the display of key support and resistance levels to monitor the likely scenario of price movement.**

«Forex Triple Hit Assistant»

Is it possible to make trading even more profitable with fewer efforts? The answer is YES!

We've developed special additional software for "Forex Triple Hit" users. It allows you to increase the efficiency and profitability of the Indicator by simplifying your trading process.

Meet "**Forex Triple Hit Assistant**".

"Forex Triple Hit" works great itself! But "Forex Triple Hit Assistant" will help you to **minimize your time invested** and **maximize your profit!**

Here's how it works: When the "Forex Triple Hit" Indicator generates a BUY/SELL signal or explores an Extra Entry Point, the Assistant window pops up immediately on your chart offering 2 options:

Enter Now

Don't Enter

The assistant window pops up all the time: at a signal generating a new trend, Extra Entry 1 and Extra Entry 2. So, you can open three trades within one trend!

Also, you can choose whether to exit the trade at the Opposite Signal or with chosen Take Profit- whichever you prefer according to your trading style.

Forex Market: Unlocking Opportunities?

If you are reading this, I bet you are a fan of Forex trading. No matter how experienced you are, it's important to be aware of the freedom and benefits that Forex is able to provide.

To be Forex Trader means:

- Do not live 9-5 groundhog day
- Work just a few hours a day from anywhere
- Have absolute control of their income
- Constantly work on self-development
- Become pro at trading over time

It goes without saying that Forex trading is full of challenges. Overcoming them, however, is the most precious experience a Forex trader can have. We take active participation by encouraging traders to "take over the world" with our trading tools.

Trading is not only about making money, it is also about enjoying the process itself.

When money from trades controlled by a robot falls into your account, it's great, but when you earn the same money by trading using the Indicator with your own hands, this is a special kind of pleasure. You know what I'm talking about!
