

KIDLingoo© LIVE English Online Teaching For Children in Hong Kong and Taiwan

Genuine English Accents for 3-8 year old children, taught by certified English teachers exclusively from the UK, the USA, Canada, Australia and New Zealand. Premium Online Education according to British Council and US Common Core State Standards.

Hong Kong S.A.R., Hong Kong, Mar 15, 2021 (Issuewire.com) - An educational technology company from Hong Kong, KIDLingoo© is successfully offering Live English Online classes in Hong Kong, Taiwan, and other countries. The company specializes in teaching English to children aged 3-8 years, exclusively with international certified English teachers from the US, the UK, Canada, Australia, and New Zealand.

Online English in Great Demand

“Global health challenges have sharply increased the demand for Online Learning, especially English courses”, says Susan Sullivan, co-founder of KIDLingoo. In fact, international surveys have shown that roughly half of all Asian public schools have changed their programs by adding game-based online lessons.

KIDLingoo© English school for children offers interactive live lessons that allow modern, state-of-the-art interaction with little students – with fast results in outstanding English speaking and writing abilities.

The company features a unique combination of an online learning curriculum with live private online lessons where students and teachers exclusively speak English. This teaching approach is not only smart but affordable - if this kind of English learning is provided face-to-face, with teachers from the US, the UK, Canada, Australia, or New Zealand, it's very expensive!

Genuine English Accent

Susan emphasizes KIDLingoo's use of genuine English accents: “Children start to learn a language by first listening to it, and then repeating it. The accent of the English teacher makes a huge difference in how they sound later when they are speaking English”.

For many young English learners from Asian countries, it may be very hard to distinguish these subtle

differences in accents, if not impossible at all. As they grow up hearing an accent regularly, once the „wrong“ accent is imprinted, it may be too late to change it at a later stage.

The use of genuine accents accentuates accurate pronunciation, where to put the tip of the tongue and the lips, and how to control intonation.

British Council and US Common Core Standards

KIDLingoo's teaching system is based on British Council and US Common Core Standards and is specially designed for children aged three to eight. Thanks to a unique and advanced virtual learning approach, students are offered highly personalized lessons.

All teachers are either British Council trained, TEFL/TESOL certified, or certified according to International Standards (e.g. CELTA), using a combination of Live teaching, animated and interactive content, and the worldwide acclaimed TPR Method (Total Physical Response).

Parent's Satisfaction with Online English

Parents will observe how their children will soon begin to speak confidently, even if they have never been in contact with the English language before. KIDLingoo's program emphasizes exploration, play, and positive reinforcement while encouraging creative thinking and social skills, which guarantees a solid foundation for future educational development.

Countless opinions from parents state that they find many advantages for their children from learning English through an advanced online platform such as KIDLingoo©. For example, saving time, experiencing new technologies, precise control over the child's educational process, and the opportunity to take part in the English learning process, as Susan points out.

It's a given fact that many parents are dissatisfied with the level of English instruction in their child's kindergarten or school. If they want their children to have more opportunities to build highly successful careers, they can try out KIDLingoo's Online English lessons free of charge.
