

Latest Taxi App Features Launched by V3cube after Lockdown in 2021

Gujarat, Ahmedabad, Mar 19, 2021 ([Issuewire.com](https://www.issuewire.com)) - V3Cube announces “Latest Taxi App Features” to equip riders and drivers for the ‘new normal’ after a lockdown in 2021.

As cities are reopening globally, millions of people are started moving again. To keep your communities safe and setting the highest possible safety standards V3Cube over the past few months with our technical team has been working relentlessly building “New Features in Taxi App” that help protects everyone every time you use Taxi App.

We are announcing the launch of our new range of “2021 **Version Of Taxi App Features**”. Aimed to build more secure and safe traveling practice in Lockdown 2021, the novel features include:

- **Restricting Passengers limit** – With every city, the rules differ. The feature allows you to implement suiting government COVID rules and regulations
- **Face Mask Verification** - Before drivers start their trip, they will be asked to click a selfie and upload ensuring that the mask is on. Our new technology feature verifies the driver is wearing a mask.
- **Apply toll costs manually** – It enables drivers to add the toll charges manually. Once confirmed by the rider, the toll charges are added to the invoice.
- **Ride Cancellation**- Both driver and rider can cancel the ride if they are not feeling safe to drive.
- **Taxi Fare Calculation 2 Models** – It allows the rider to pay as per the estimated fare

before the ride starts or, as per the traveled trip

- **Safety Ratings and Reviews** – Riders are asked to provide feedback and rating for the driver if he/she followed the COVID91 safety rules
- **Graphical Status of Rides** – It shows the status of the booked ride via graphical icons via App notifications
- **Safety Checklist** – Carrying safety supplies, such as masks and sanitizers will be mandatory. There will be a list of the checklist provided to the taxi drivers.
- **OTP Verification To Start Ride** - The riders are generated OTP for the taxi drivers to confirm the start of the trip.

As we move into the new normal, our goal is to encourage this same sense of shared responsibility towards Taxi drivers, and riders—we all have a role to play in keeping each other safe.
