Norton.com/setup - Enter Norton Product Key to Setup Norton

Enter Norton Product Key to Setup Norton

United Kingdom, London, Mar 1, 2021 (Issuewire.com**)** - This website (norton.com/setup) is only a guide for users to understand the process to Download, Install and Activate Norton Products, we do not have any affiliations from **Norton** and any other company related to Antivirus.

Norton is considered one of the most effective antivirus software among Mac and Windows users. Norton Setup can help you install the security program on your computer effortlessly, and you can get it from www.norton.com/setup. This antivirus is a full-fledged PC protection suite, so once you have installed it on your device, you won't need the default security program that comes with all Windows 10 computers.

Downloading Norton

Do you want to download the Norton Setup file on your computer so that you can install it? If so, then please look at the guidance given here below:

- First, you need to ensure that your computer can run Norton's latest security software without getting slow. If your computer has 2 GB of RAM, 1 gigahertz processor, roughly 1 GB of free hard drive, then you will be able to run it without any problem. To check your computer's specification, simply launch the start menu and search for 'dxdiag.'
- Now you can visit the Norton setup download portal, Norton.com/setup.
- As you visit the website, first of all, make sure that you have an account on the website.
- Now login with your account, and if you do not have it, then register for a new account.
- Once you have signed in, there will be an option to redeem your Norton product key on the site's homepage.
- Please use those options to redeem your key safely.
- After that, locate the option that says Products and Services.
- Select a product to download.
- Click the Subscribe Now button to continue with the product you have selected.

- Check out the product using the desired payment method.
- After the checking out process, your download will automatically start.
- If it doesn't start automatically, there will be a button saying 'Click here.'
- Just press that, and your downloading will start.
- Wait a minute, and your download will finish.
- Congratulations, you have successfully downloaded Norton setup on your device.

Installing Norton Setup

The latest Norton setup is easy to install, and with the below instructions, you can install it relatively easily:

- On your web browser and then open the Downloads.
- In the Downloads list, there will be a Norton Setup file that you got from Norton Setup.
- Please double click that file, and it will automatically ask you to start the process.
- Just click Yes to continue.
- Now the installation window will appear on your computer screen.
- We advise you to watchfully go through the license agreement that appears at first when you launch the installer.
- After reading that, click Agree & Install.
- The installation will begin after you go through the on-screen prompts.
- It will complete automatically within a few minutes.
- On completion, please restart your computer.

Activating Norton Antivirus

The antivirus you have just installed requires activation every time you install it. You can activate it using the steps given here:

- First of all, open your Norton application.
- As you open the application, navigate to its settings.
- Find the About section and then select the Check Activation Status icon.
- It will show you if your antivirus is activated or not.
- If you are program is not activated yet, it will show you some instructions to activate it.
- Please follow its instructions, and when **Norton.com/setup** appears, please comply with it as well.
- This will activate your program within no time.
- Once your program is activated, you can use it.
