

PhytAge Laboratories Launches New Website

Texas, Austin, Mar 17, 2021 ([IssueWire.com](https://www.issuewire.com)) - [PhytAge Laboratories](https://www.phytage.com), one of the nation's leading providers of all-natural supplements, is proud to announce the launch of a new website. The new website is designed to help users easily learn about the company's various products, including Tinnitus 911, Nerve Control 911, Prostate 911, and many others.

"Today, our complete line of nutrition supplements helps thousands of people every month bolster the beauty of their skin, achieve and exceed their physical health improvement goals, see with sharper vision and help support the repair of a variety of other health issues," PhytAge Labs states.

The company's initial success with its flagship plant-based skincare supplement (then known as PhytAge Labs PLUS) inspired it to broaden the range of supplements being offered. "At PhytAge Labs, we only produce supplements that are 100 percent naturally effective and backed by comprehensive clinical studies."

The growth of PhytAge Labs can largely be attributed to the company's unique ability to provide supplements that are both lab-tested and made with natural ingredients. Too often in the supplement industry, according to some clients, are individuals forced to choose between one or the other.

The supplement industry, as a whole, has grown at a steady rate of about 10 percent per year since 2015. Currently, the total market size of the supplement industry is about 123.28 billion USD. Reasons attributed to the growth of the industry include the high cost of traditional pharmaceuticals, addiction risk, and a growing preference for natural ingredients.

The company's new website was largely launched to help support increased traffic and improve the user experience. The current site includes a highly navigable homepage, supporting information about each supplement, about us and FAQ pages, a blog, and a contact page.

Rather than needing to visit a physical store, users can utilize the [PhytAge Laboratories website](https://www.phytage.com) to deliver the company's various supplements directly to their homes. With increased accessibility, a better website, and a wider selection of lab-tested products, PhytAge Labs expects 2021 to be another successful year.
