

rBitex to launch Game-Changing Crypto Exchange

Telangana, Hyderabad, Mar 7, 2021 ([IssueWire.com](https://www.issuewire.com)) - rBitex Ventures Private Limited, a Fintech company based in India, plans to launch a global marketplace for all cryptocurrency assets. Even though rBitex has only emerged in the market this year, they will be a game-changer in digital assets trading.

The platform is intended to be unique in all aspects and completely revolutionize the digital asset trading landscape.

rBitex Exchange is focused and dedicated to providing a unique and comprehensive trading experience for everyone with different experience levels. The platform itself is equipped with a matching engine that can support over a million transactions per second, making it one of the fastest cryptocurrency exchange platforms globally.

The team behind rBitex wanted to create a platform to combat some problems within a cryptocurrency exchange platform from poor customer support, asset security, and inconvenient user interface.

Generally, when users have questions or issues when trying to use a feature on a platform, they go directly to customer service to find the answers they are looking for with some disappointment.

Sometimes, platforms cannot provide adequate support because they do not have enough resources to meet the user's needs. rBitex wants to fight that problem by employing experts in the cryptocurrency field to provide information and expertise when handling customer-related inquiries and needs.

Additionally, they want to combat the potential problem of cyber hacking by providing several layers of protection so that both the wallet and the funds of its traders are safe. The platform considers cybersecurity as one of its top priorities. So, traders can enjoy the benefits and opportunities of cryptocurrencies while also known that all their money and information are safe.

Finally, while some user interfaces can be complicated and unfriendly, rBitex Exchange wants to create a user experience that is intuitive and easy to use.

At the time of launch, rBitex plans to have additional features like multilingual support, excellent customer support and improvement, super-fast KYC, and a 24/7 trading platform.

After the official launch has happened, the platform will continue to develop and will include spot trading, social trading, and margin trading.

Know Your Customer (KYC) is a mandatory requirement for users that plan to trade on rBitex.com .

To get more benefits from the platform, users must have rBitx coin, the native token of rBitex Exchange. It can be used to pay for any fees on the platform. rBitex will also provide dividends to rBitx holders, discounts, regular airdrops and shall be a launchpad for new projects.
