

Rebel Networks Announces the Launch of New Website with added Features for customers.

Ontario, Mississauga, Mar 23, 2021 ([IssueWire.com](https://www.IssueWire.com)) - Rebel Networks today has announced the launch of its new responsive website along with a new customer portal to enhance customer's ability to manage their Cloud hosting solutions easier. New Customers can clearly navigate throughout the site and obtain information fast and easily. Many portals are available as drop-down menus to ease customers to log in to their various services that Rebel Networks offers. MyPortal.rebelnetworks.com now supports functionality with cPanel, thus, from within that portal customers can manage various aspects such as email, FTP, PHP version, etc. without the need to access cPanel.

Since the start of the pandemic, businesses have been shifting from the office to the home and Rebel Networks has responded by allowing the home a simple and secure method to login to their Managed Hosted Exchange, the SyncBlaze Cloud File Server, as well as other services from with a secure monitored VPN connection. Rebel Networks understands that employee safety is of paramount importance.

Rebel Networks now has added [24/7 Live Chat support](#) available through the website, which will help new customers understand our offerings, as well as direct existing customers to proper support channels.
