Delhi, New Delhi, Apr 1, 2021 ([Issuewire.com](https://www.issuewire.com)) -

- Savvy HRMS introduces Hire-to-Retire Cloud-based HR Software for professionals
- The software is highly configurable and especially designed for HR professionals
- It is introduced to monitor all locations through a streamlined centralized system

[Savvy HRMS](#) has launched highly competent and efficient HR software, well equipped with multiple traits and customizable services. This software is diligently created to befit the requirements of HR professionals.

Mr. Chandra Shekhar, The Director of the Company, stated *"We have done massive research on the needs of HR personnel at their workplace and devised the most suitable software integrated with ample features.*

Some exclusively designed features of this cloud-based HR software are as follows –

Configurable and Customizable

This Hire-to-Retire Cloud-based HR Software encompasses ample tools to manage various policies of an organization under one roof. It is quite customizable to suit well with the companies carrying multiple policy systems. This highly configurable software is a boon for bigger units having a good volume of employees in different grades.

Bulk Data Uploading

With the embedded feature of bulk uploading in this software, HR professionals can manage their data in no time. Be it employee creation or updation and master creation, you can use its uploading templates without any hassle. Moreover, it possesses a unique notification system once the data is uploaded.

Single Window Concept

Its single-window concept is more relaxing for HR professionals owing to the hassle-free reminders of tasks and their deadlines. With zero complications of a multiple screen system, the organizations can get better insights into employee attendance, leave applications, leave calendar, pending leave requests, and other approvals. Apart from this, it enables the users to handle multiple tasks related to different modules without leaving the page.

Leave Ledger and MIS Reports

Dealing with MIS reports in any organization is a troublesome task as long as the users are not aware of this multi-functional software. Now, downloading more than 50 reports in a single go is no more a miracle. It also focuses on the monthly employee leave ledger without any interruptions. You can also use certain specific filters to customize the reports and send the same at the scheduled time.

Centralized System

It contains a well-managed centralized framework to handle multiple queries of the users within seconds. Just like other search engines, it helps the users with better search results and related solutions. You can add keywords related to your query and get instant resolution. Other than this, keyword suggestions, auto-correction, etc are also available.

Detailing

The software provides detailed analysis of completed, pending and upcoming tasks with a clear-cut insight of deadlines. All in all, the users cannot miss a single chance to deliver their work on time.

On the launch of the software, Mr. Shri Krishna, Co-Director and Operation Head of Savvy HRMS, said, "It hectic tasks, it also makes your job easy and relaxing."

Mr. Salilendra Kumar, Co-Director and Implementation Head, added, "We are keen to announce the launch of this stupendous cloud-based HR software for all the professionals who want to enhance productivity and efficiency within their workplace."
