

Student Coin Has Already Raised Over \$19 Million In STC ICO Sale

Poland, Warsaw, Mar 29, 2021 ([IssueWire.com](https://www.issuewire.com)) - Student Coin Already Raised Over \$19 Million In STC ICO Sale

To advance the field of cryptography, a team dedicated has developed one of the most intriguing utility tokens that will forever change the way you view cryptography - the STC token, available on its dedicated ICO since

What Is An STC Token?

STC is the main utility token of [Student Coin](#) blockchain project - which makes it possible to create personalized tokens without solid technical knowledge.

Having an account on the platform allows you to create:

- Personal tokens - unique assets linked to a single account;
- Starter Tokens - assets that help you take a step forward towards your dreams;
- Corporate tokens - unique assets dedicated to a single company;
- DeFi tokens - assets that allow you to perform
- NFT Tokens - transferables tokens that make switching between platforms possible.

All of these tokens are valued against the STC token, and they can be used for trading, trading, even crowdfunding.

Why Is The STC Token Special?

What makes the STC token superior to other tokens is its focus on the most important people in the world economy - students.

They are the next generation of employees, which will mark the success of current and future businesses. To give people the chance to get a better education, it is necessary to make university programs more accessible.

But it's not that simple. The reduction in tuition fees will lead to a reduction in the budget to allow qualitative researchers, teachers, programs, international collaborations, etc.

Until now the solution was bank loans. However, with an unpredictable economy, people have lost faith in banking services. And who can blame them?

Therefore, the Student Coin team came up with a solution that decentralized student loans - crowdfunding with personal tokens.

How Does It Work?

The future student creates his personal token. This token is put on the student coins market. STC holders buy the tokens until the student receives the necessary money for the tuition fee. Once the student graduates and finds a job, part of their salary will be blocked to pay off the loan. STC holders receive a cyclical payment of profits for their participation.

This project is supported by **over 500 leading universities** around the world, including Harvard University, the University of Manchester and the University of Copenhagen.

A simple way for students to get the funds they need to make their dreams come true. At least, that's the main goal, but this process can also be applied to visionary entrepreneurs.

And that's not the only reason Student Coin is getting started. Holding STC tokens gives users the ability to vote for the development of the project and even sign petitions if needed. It's a whole ecosystem created to give people what they need and increase the usefulness of cryptocurrencies.

How Can You Join and Then Buy STC Tokens?

First of all you should create a Free Account (make sure you don't miss it) at [Student Coin Launchpad ICO](#), available until April 30. After learning more details about our company and its opportunities you will make your decision to get your STC tokens,

Although this started just 45 days ago, the team have already raised \$19 million in STC tokens and completed over 100 phases.

Each phase completed so far had a fixed cap of 150K USD, and the price increased by 1% with each reloads.

Joining the ICO not only gives you access to these tokens up front, but also gives you additional perks.

If you recommend the ICO to your friends and send them a unique referral link, you can earn 20% [ETH](#) invested by each of your friends, alongside 30% of their purchases STC.

Your friends also receive an additional 5% of purchased STC.

Who's behind Student Coin?

Student Coin is backed by a dedicated team of 44 people from 12 different countries ready to expand crypto usability and create solutions for the needs of the world. Among them, you can find the former IBM technical director for Europe, for example, or the president of the Harvard University Club of Poland.

By the end of 2021, the team plans to develop and implement STC Exchange, STC Terminal, and even an STC app, in addition to listing the token on major exchanges. cryptographic.

So if these innovative ideas caught your eye, join the ICO and be sure to follow them on social media to be up to date with their features.
