

TechSilver launches revolutionary wall mounted fall detector for elderly

. TechSilver is set launch later this month the UK's first wall mounted fall detector. This revolutionary fall detector uses advanced 4D imaging technology pioneered by world-leading experts.

Nottinghamshire, Nottingham, Apr 1, 2021 ([Issuewire.com](https://www.issuewire.com)) - Leading online British retailer TechSilver is a 'one stop' online store for high-quality tech products that help elderly and vulnerable people to live a safer and more independent life. TechSilver is set to launch later this month the UK's first wall-mounted fall detector.

This revolutionary fall detector uses advanced 4D imaging technology pioneered by world-leading experts. With 1/3 of people over 65 and 1/2 of those over 80 having a fall at home at least once every year, this device helps keep elderly loved ones safe with immediate alerts in the event of a fall.

This wall-mounted fall detector is unique in that it doesn't use any wearables, avoiding many of the challenges with existing solutions. Wearable fall detectors are often seen as stigmatising and therefore many older people choose not to or forget to wear them, rendering them useless. In addition to this,

older people often fall slowly and may attempt to steady themselves on the way down, meaning existing wearable solutions that are only triggered by a hard impact, miss detecting many falls.

This device is easy to install and doesn't require any tools to mount, there is no need for WIFI and it can detect all different kinds of falls, not just hard ones. It scans the room 24/7 and will automatically detect any fall immediately without the need for a camera, wearable, or pendant. A 2-way voice call between the wall-mounted device and the emergency contact/s phone is automatically launched as well as a phone notification. This means help can be summoned immediately, regardless of whether it's in the form of an ambulance, caregiver, or loved one; reducing the risk of health complications from the fall.

Respecting the privacy and independence of our elderly loved ones should be at the heart of how we decide upon their care, that's why this wall-mounted fall detector has no cameras to ensure maximum safety without compromising on their privacy.

Notes to editor

Wall-mounted fall detector for elderly sold online RRP GBP £249.95 (with VAT Relief) + Monthly subscription fee
