

Top Chart DJ & Producer creates a research database "Rudkin Research"

Robert Lindsey, professionally known in the music industry as Bobby Blakdout, has created a new research database filled with information you may have never known existed.

Florida, Saint Augustine, Mar 13, 2021 ([Issuewire.com](https://www.issuewire.com)) - Top chart DJ & Producer, Robert Lindsey, professionally known as "Bobby Blakdout" in the music industry, known for founding Blak'd Out Records & breaking Boogie T and other artists into the top charts has created a new project. This project is a database of information with cited sources in loving memory of his stepfather Greg Rudkin, who passed

after a heroic battle with cancer. Robert found himself with EVALI, a lung injury from vaping e-cigs, and dove into researching subjects like Peptides.

A specific peptide he found showed promise for patients with COPD and EVALI so he gave it a try. Robert said, "I got to the point where I felt like it was getting better or die trying, I was using a CPAP to breathe after going to countless doctors including the Mayo Clinic Specialists who misdiagnosed me." Robert also says he found interesting information about these peptides after further research. "I found online after researching more in-depth after it helped me that **Thymosin** alpha1, a 28-amino acid **peptide**, is not only well-known immune system enhancement but also helped in the treatment of various diseases and has been investigated to show proliferation and apoptosis of human **leukemia** cell lines. The truth is after reading that I felt like shit, I couldn't believe I couldn't have found this peptide in time to help my Greg."

Roughly a month later, the top chart DJ and founder of Blak'd Out decided that this information needed to be indexed and able to be searched easily by keyword. He has named the project "[Rudkin Research](#)" in memory of his stepfather Greg Rudkin and has promised to continue expanding the database in hope that more research will be done to help save more lives. He stated, "I still kick myself in the ass to this day, every day, for not finding this information sooner."

It appears as if [RudkinResearch.com](#) will be an interesting project to keep on your radar and is something we have not yet seen in the community!
