How to Download, Install, and Activate the Webroot Antivirus on Any Device?

In order to get the software for the protection and security of your computer systems, first of all, you will need to download the software's setup file on your device. And after you are done downloading the setup file, you can easily install and activate it on your computer systems. For that, you will need to access your product activation code. Now, you might want to know about the Webroot activation code. It is a unique 25-digit code that consists of numbers and letters. If you have purchased the Webroot antivirus software through an offline store, you will be able to find the code printed on the back of your

retail card. While in the case of the online purchase, you will find the code on your registered email address. After getting the code, signing into a Webroot account is necessary. And if you don't hold a Webroot account, then use the **"Sign Up"** button to create one.

All this can be quickly done by going through the product website. You can go through the product homepage by clicking on the link mentioned here: [Webroot Security](#). Also, before you start with the procedure, make sure that your device is connected to a Wi-Fi connection. And now, let's see the complete process of downloading, installing, and activating the Webroot Secure Anywhere antivirus software on all devices.

Process for Downloading Webroot Antivirus

Mentioned below are the steps for downloading the setup file of the antivirus software. Please follow these steps:

- To get started, launch any trusted web browser on your computer system and then visit the Webroot SecureAnywhere website.
- After you reach the homepage, type in your email address and your product activation code. And then, hit the **"Next"** button.
- And now, you will need to log into your Webroot user account. Log in by entering your credentials.
- And to create a new Webroot user account, click on the **"Sign Up"** button.
- On the next screen, select the product that you want to download and choose a subscription plan for the product.
- Wait for a few minutes until the setup file gets downloaded on your computer system. And that's it.
