2 DAYS VIRTUAL TRAINING & CERTIFICATION PROGRAMME

ORTHOBIOLOGICS

A NEW FRONTIER FOR MUSCULOSKELETAL & SPORTS MEDICINE

S.T.A.R. 2021

DATE : MAY 01ST & 02ND, 2021

REGISTER AT www.advancellsgroup.com/star-2021

Ms. MEENAKSHI BHANDARI  meenakshi.bhandari@advancells.com  +91 99971831717

Uttar Pradesh, Noida, Apr 22, 2021 (Issuewire.com) - Orthopedic disorders can arise from injuries or spasms that affect the musculoskeletal system involving muscles, bones, joints, ligaments, tendons, and other connective tissues. In recent years, therapeutic options against orthopedic disorders have shifted from pain steroids and surgeries to alternative regenerative medicine. The alternative treatment candidates, in the case of musculoskeletal disorders, including Viscosupplements, Platelet Rich Plasma (PRP), and stem cells, are collectively termed Orthobiologics. According to current statistics, the market size of orthobiologics is expected to grow at a CAGR of 5.9% by 2027. This makes it all the more important for doctors and clinicians to understand the concept and application of orthobiologics in the case of musculoskeletal medicine.

S.T.A.R 2021 ([Orthobiologics-A New Frontier for Musculoskeletal and Sports Medicine | Date: 8th and 9th May](#)) by **Advancells Group** brings a unique opportunity for orthopedic doctors, surgeons, PMR doctors, sports and pain medicine experts to learn high-end ultrasound-guided musculoskeletal injection techniques, GLP/GMP compliant bioprocessing technology, and relevant clinical regulations. The international speaker panel of the virtual workshop includes **Mr. Suresh Sudula MCSP** [Head of Education, Advancells Group and Director of The Kent Musculoskeletal Clinic (UK)], **Dr. Lorenzo Masci** [Sports and Exercise Medicine Physician (UK)], **Dr. Lipi Singh** (Clinical Scientist Regenerative Medicine), **Mr. Ansar Mahmood** [Consultant Orthopedic Surgeon (UK)], and **Ms. Shraddha Singh Gautam** [Head of Lab, Advancells Group].

As per Mr. Suresh Sudula MCSP, “**There is a huge potential of Orthobiologics in musculoskeletal and sports disorders. Our aim is to guide and help clinicians of all specialties know about this potential**”. S.T.A.R 2021 promotes the application of stem cells, bone grafts, PRP, allografts, and other orthobiologic components to usher in a new age of therapeutics pertaining to the safety of the patient. The workshop aims at guiding doctors and researchers in exploring advanced technologies like ultrasound-guided injections and regenerative medicine, besides providing an international platform to propel collaborative projects in the future. The interactive S.T.A.R 2021 workshop aims to push doctors and clinicians towards the challenge of providing quality alternative treatments to their patients without any side effects of pain medications, steroids, or surgical risks.

About Advancells Group:

Advancells Group believes in the vision of a cure-driven world. Established in 2013 by **Mr. Vipul Jain**, Advancells provides customized protocols for the 360-degree management of health disorders with regenerative medicine as a solution. We believe in promoting stem cell awareness to ensure that patients and caregivers, worldwide, know their role in the regeneration of damaged body tissues for neurodegenerative, musculoskeletal, organ damage, and aging disorders. Visit us at www.advancellsgroup.com for more info.

Shaping the Future

PRESENTS

2 DAYS ONLINE TRAINING & CERTIFICATION PROGRAMME IN APPLICATION OF ORTHOBIOLOGICS IN THE FIELD OF MSK AND SPORTS DISORDERS

S.T.A.R. 2021

ORTHOBIOLOGIC: A NEW FRONTIER FOR MUSCULOSKELETAL & SPORTS MEDICINE

The S.T.A.R. 2021 workshop on Orthobiologics and advanced ultrasound-guided technology aims at training participants in ultrasound guided MSK injections in the domain of Orthopedics, Sports Injuries, and chronic pain conditions, besides discussing effective GLP bioprocessing practices, regulatory guidelines and relevant clinical case studies.

DAY 1 : 08TH May

Time : 13:30 - 16:30 IST

- A. Introduction.
- B. Orthobiologic: Today and Tomorrow.
- C. Advancells: Cell Processing Laboratory and Research in Compliance with GMP/ULP.
- D. A Clinical Commentary on Interventional Orthobiologic Treatment Protocol & Evidence.
- E. Informed Consent, Clinical Guidelines & Compliance with Global Regulatory Requirements.
- F. Q & A Sessions.

DAY 2 : 09TH May

Time : 13:30 - 16:30 IST

- A. Need of Effective Training for Bio Processing Laboratories.
- B. Introduction to Musculoskeletal Ultrasound & Evidence.
- C. Ultrasound Guided Musculoskeletal Injection Techniques: Lower Limb.
- D. Ultrasound Guided Musculoskeletal Injection Techniques: Upper Limb.
- E. Case Studies.
- F. Q & A Sessions.

SPEAKERS

Mr. Suresh Sudula MCSP
Head of Education, Advancells Group

Dr. Lorenzo Micali
Sports and Exercise Med. Consultant (UK)

Dr. Lijal Singh
Clinical Scientist Reg. Med.

Mr. Anwar Mahmood
Consultant Orthopaedic Surgeon (UK)

Ms. Shwadiha Singh Gaurav
Head of Lab Operations, Advancells Group
