

BACORP Building Group Specializes in Custom Home Construction in LBI

New Jersey, Lacey, Apr 7, 2021 ([Issuewire.com](https://www.issuewire.com)) - [BACORP Building Group](#) owner, Alan Baker, has earned a reputation as a premier custom home builder for those that desire an abode that's out of the ordinary. The company is a green builder with multiple options available for energy-efficient design.

The master builders understand the need to deliver the finished home on time and within budget. The company provides a 30-day and one-year service checklist and free consultations. With the company's advanced architectural software, clients are able to see the interior and exterior design elements of their dream home and take a virtual walk-through.

Serving the Jersey Shore area, the [custom home builders in LBI](#) are upland and waterfront design experts. Building on waterfront properties can present some unique challenges, restrictions, and considerations that aren't applicable to inland construction projects. The company's experts are cognizant of all relevant regulations and standards.

The [home builder in LBI](#) is a master of energy-efficient solutions. An increasing number of clients are seeking to build in ways that will save them money and reduce their carbon footprint. BACORP Building Group, Inc. is experienced in providing smart design, utilizing natural light, and construction that provides an elevated healthy air quality level through ultraviolet electrostatic air cleaners.

The company's award-winning energy-efficient [residential construction in LBI](#) is ENERGY STAR®-certified and verified under EPA and DOE auspices. BACORP Building Group, Inc. offers one of the largest selections of highly-sought options within the luxury home construction industry encompassing tankless hot water on-demand systems and Laundry Pure that cleans through ionization to eliminate water and detergents.

Energy-efficient doesn't mean expensive. BACORP Building Group, Inc. vets all green construction features to ensure value before they're recommended to clients. Individuals can consult with the company with confidence knowing all of the company's staff have achieved the Certified Green Professional Designation and the company holds numerous memberships in prestigious professional organizations.
