

Decibell Announces Kinetic One WIRED & Kinetic One WIRELESS Vibrating In-Ear Headphones

Feel the sound with Decibell's unique 10mm vibration module. Pledges start as low as \$20USD at [Kickstarter.com](https://www.kickstarter.com)

Hong Kong S.A.R., Hong Kong, Apr 15, 2021 ([Issuewire.com](https://www.issuewire.com)) - Decibell is bringing an immersive audio experience to your mobile device, with the development of their new vibrating in-ear headphone product line, Kinetic One. From gaming to watching movies or TV shows, everything is moving towards mobile platforms. Decibell's Kinetic One line is an affordable product that gives you an immersive audio experience while on the go. Decibell's Business Development Director, Nelson Lam has over 12 years of experience in the production and development of consumer electronics and has worked with some of the biggest audio brands in the world.

The Decibell Kinetic One vibrating in-ear headphones give users a well-rounded and immersive sound experience. Each side has a conventional dynamic moving-coil 10mm driver, which provides a warm

and clear response from low to high frequencies, and a 10mm vibration module that boosts the lower bass frequencies at 100-350Hz. When low frequencies occur, the unique 10mm vibration provides a haptic experience that allows the user to *feel* as well as hear the low frequencies creating a more realistic sound experience.

Technical Specifications WIRED:

Decibell's Kickstarter crowdfunding campaign has been started and will launch on May 4, 2021. It can be previewed here:

<https://www.kickstarter.com/projects/1989469088/1419051034?ref=6ovyn3&token=054a5f61>

The total goal to be funded is HK\$100,000 (approx. \$12,000 USD) and will help Decibell cover the costs of tooling, sample development, and production. Pledges start as low as HK\$158 (approx. \$20 USD), as a special early-bird price, the first 300 backers of one the Kinetic One WIRED. That's 40% off the MSRP.

A pledge of HK\$588 (approx. \$70 USD) secures the backer a Kinetic One WIRELESS. The top pledge of HK\$788 (approx. \$100 USD) includes the Kinetic One WIRELESS with a dongle that allows you to connect to a mobile gaming device such as a Nintendo Switch! A wire-free, immersive gaming experience on the go!
