

Deciphering the Undecipherable; Puzzling set of philosophical indictments opens up the thought process

West bengal, 24 Parganas (n), Apr 17, 2021 (Issuewire.com) - Some of the finest beacons pertaining to life's troughs and crests happen to have been guided by certain philosophical questions. And, what's the better way to run the thought process than to ponder upon the riddling set of quotes.

Hailing from Kashmir, Author Musqit Chishti comes up with his groundbreaking work where he puts forth before the readers a torrid set of quotes. The entire book comprises quotes. Well, this might sound absurd. But hey, this is one such book that stands apart from the rest. These are not just ordinary quotes. These are the ones that will make you think, and technically on today's date, we are all short of time. The mundane routine almost puts us in a state of being obtuse. This is where Mr. Chishti steps in and goes on to offer the readers an enticing set of quotes that makes the readers think that in turn will consequently broaden the mind.

These are not hollow sayings; these are very deep in relation to our life. The myriad of meanings that our life entails does not get lost in the conundrum but is stored somewhere in the mind. We just need to unlock it. And, Mr. Chishti rightly does so. The wisdom of his words will consequently aim at the soul of the readers.

Having his interest in the Sufi philosophy, the author does not believe in luring the readers into some undecipherable aspects. On the contrary, he aims to take the readers on the journey and consequently mystify their souls.
