

FoodPanda Clone – New Features Provides Safety Measures Ensuring Safe Food Delivery During COVID19

Foodpanda Clone App – How New Features Worked it Up Ensuring Safety Measures In The Times Of COVID19

Gujarat, Ahmedabad, Apr 16, 2021 ([Issuewire.com](https://www.issuewire.com)) - From providing contactless delivery options to incorporating new features in the food delivery app that offers safety sanitization measures. Know more about how food aggregators like FoodPanda Clone, Ubereats Clone, DoorDash Clone, etc. are ensuring that the food package you receive is hygienic.

In the wake of the Pandemic, people are shifting their shopping preferences to the delivery app. Everything from lattes to lunches there has been a record number of on-demand food delivery app downloads recently. Thus, it has led to an unprecedented growth spike in the online food delivery industry. People are mandatory to stay home thus with only resort to order food online.

To keep the communities safe during this Pandemic and ensuring the highest safety standards has come up with the FoodPanda Clone app integrated with the new version of features 2021 that ensures COVI19 safety measures.

If you are looking to flourish your food delivery business, buy our white-label FoodPanda Clone App integrated with the new version of COVID19 safety measure features. Not only FoodPanda, buy our COVID19 safety measure feature designed UberEats Clone App, DoorDash Clone App, or any food delivery app you want.

Thus allowing to minimize the human touch. The white-label on-demand food delivery app comes in-built with COVID19 Safety Measures ensuring a hygienic service experience to the customers and employees both.

The COVID19 Safety Measure Features Include:

Face mask verifications

The delivery driver has to upload the selfie wearing a face mask, thus verifying that he/she is practicing the safety measure.

Safety checklist

Always wearing a face mask, sterilizing the delivery bags after the shift, maintaining good personal hygiene, washing hands regularly, taking temperature, and abide by the health and safety checks are the safe [food delivery app like the FoodPanda](#) feature comprises.

Safety badge

This feature highlights those restaurants that are strictly following COVID19 safety measures. The badge in a way informs customers that the place is hygienic and safe to order food.

Contactless deliveries

The delivery driver takes the picture of the food package delivered to the doorstep. Thus lowering the virus transmission.

Pickup or take away

The restaurant keeps the order ready for pickup at the scheduled time and the customer can come to pick up/take away the order.

Encouraging cashless transactions

Ordering food via contactless delivery is great but, what about the payment? Encouraging digital transactions is important. Thus, our FoodPanda Clone App and similar on-demand food delivery app come integrated with multiple payment options including Wallet/ Google Pay, Credit card/debit card, UPI, and Netbanking. Therefore eliminating the contact between the delivery driver and the user.

Safety ratings and reviews

The users are asked to provide safety ratings and feedback to know and improve how the entire food ordering and delivery experience was.

Graphical status of the ordered food

The feature provides the status of the food ordered using graphical icons through in-app notifications.

About On Demand Clone

On-demand clone is a leading name in the mobile app development world. If you are looking to build on-demand delivery apps or something specific the app development team is ready to head on.

The aim is to design scalable, mobile apps using the latest technologies. Our widely sellable apps include “DeliveryKing App” “Gojek Clone App”, “grocery app clone” and “Taxi-booking Multi-service App Clone”

If you are looking to build a single niche product we provide that too. We offer a wide range of on-demand apps that includes “instacart app clone” “Doordash clone”, “Careem clone” and so on.
