

G-Fly's Latest Album Swam Hosts Incredible Melodic Hooks to Engage the Crowd

Led by three flamboyant members, G-Fly releases their latest album Swam which takes a fine attempt in exposing their musical brilliance in front of the world.

Mississauga, Apr 17, 2021 ([Issuewire.com](https://www.issuewire.com)) - Capped with the power of lyrical brilliancy and other essential hip-hop characteristics, a musical group that drives to bring back the essence of raw hip-hop with their composition is **G-Fly**. Led by artists [J-Good](#), [Knock Em](#) and [Julius Ice](#) the group has been putting out unique music at a prolific rate and with incredible consistency. It's rather rare to spot artists who bring to the table their distinctive features and work united to curate something majorly impactful. Buzz started to increase when the artists positioned themselves as one of the best in

today's scene by releasing their latest album Swam.

The group's musical taste is unpredictable and the lead vocalist raps at a breakneck speed with a subtler hint of melodies to make some of the catchiest rap songs this year. Few songs like **'No Cap'**, **'Make a Lic'** and **'Gunz & Butta'** remain as the major highlight from the catalog and features an impressive production with experimental vocal performances and distorted bass. The culmination of the individual artists' proficiency with the moody trap sounds makes the songs incredibly groovy.

Flowing through numerous twists and turns, the songs dive into various stories, sometimes low-key and at other times aggressive to set the mood right. Hailing from Canada, **G-Fly** just wants to get their name heard in the industry and is paving their path in the right direction to establish a remarkable mark. Built under the label Gfly Ent, the songs **'No Cap'**, **'Make a Lic'** and **'Gunz & Butta'** is well-reflective of their uniqueness in the genre. The closer the audience listens to their sound, the more they stumble upon their genuineness. Follow them on Spotify, Facebook and Instagram for more details.
