

Gideon O. Nnabuike, BSN, RN, a Registered Nurse with the Texas Health and Human Services Commission (TX-HHSC).

Get to know Registered Nurse, Gideon O. Nnabuike, who serves patients in Texas.

New York, New York City, Apr 16, 2021 ([Issuewire.com](https://www.issuewire.com)) - Gideon is a registered nurse specializing in the case management of individuals with developmental or intellectual disabilities and psychiatry. He works at the Texas Health and Human Services Commission (TX-HHSC) in the health specialty system; serving over twenty-five million Texans.

In September 2016, Texas began transforming how it delivers health and human services to qualified Texans, with a goal of making the Health and Human Services System more efficient and effective.

Graduating with his Postgraduate Bachelor of Science degree from The Hebrew University of Jerusalem in 1997, Gideon went on to earn his Bachelor of Science in Nursing degree from Grand Canyon University in 2014. He is currently enrolled at Regis College, studying to obtain his Doctor of Nursing Practice degree, specializing in psychiatric mental health Nurse Practitioner. (DNP-PMHNP).

Among his professional affiliations, he is a member of the American Psychiatric Association, the American Case Management Association, and the Sigma Theta Tau International Honor Society of Nursing, a Lifetime Member of Phi Theta Kappa International, and National Collegiate Honor Society.

On a more personal note, Gideon attributes his success to truly caring for his patients and always wanting to provide them with the best quality care. As an excellent educator, listener, and caring person, I love to put a smile on my patient's face every day

A Registered Nurse (RN) is a nurse who has graduated from a nursing program and met the requirements outlined by a country, state, province, or similar licensing body to obtain a nursing license. RNs fulfill a variety of job duties. In addition to their primary role in treating and caring for patients, their responsibilities also include educating patients and the public about a variety of medical conditions, as well as providing emotional support, coordinating care, and advice to the families of their patients. Other RN job functions include leadership, research, performing diagnostic tests and analyzing results, operating medical equipment, administering medications, recording patients' symptoms and medical histories, and assisting with patient rehabilitation and follow-up.
