

## GM Lighting Launches LUXcontrol™ Smart Lighting System

**Illinois, Chicago, Apr 6, 2021 ([Issuewire.com](https://www.issuewire.com))** - GM Lighting announced a “smart” addition to its product portfolio. The new powerful LUXcontrol™ smart WiFi lighting system allows users to control LED tape and other lighting products from anywhere in the world with the LUXcontrol App available on Google Play and the App Store. The system consists of low and high-voltage controllers that can control not only standard but also RGBW and CCT linear LED. The offering also includes smart dimmers, plugs, and outlets. GM’s LUXcontrol WiFi system is easy to install with no hub required and can control an unlimited number of fixtures. The app enables users to preset scenes, set schedules, timers and use

voice commands with Amazon Alexa® and Google Assistant™ to control our smart lighting system.

“LUXcontrol is a fantastic opportunity for GM Lighting to take the innovative step forward in smart home connectivity,” said Rob Gerber, the President of GM Lighting. “Our new smart lighting system is an excellent example of how we can add technology to make residential and commercial spaces work harder for our customers.”

GM Lighting is a lighting manufacturer specializing in residential and commercial fixtures spanning linear LED, undercabinet lighting, and other accent and task fixtures.
