Telangana, Hyderabad, Apr 6, 2021 ([Issuewire.com](https://www.issuewire.com)) - Hydromo, a water, and renewables company has recently released its latest offering- a bouquet of sustainable water, energy, and organic food solutions for the Luxe Home segment -HydroEn.

HydroEn caters to the constant need for Eco-friendly, Green, and Sustainable living which is growing in India, even though green villa designs & engineering are not alien to the Indian ethos.

A building or revamping high-energy and water-efficient homes are necessary for health, wellbeing, and sustainability as these three forms are the bulwark of modern living.

[HydroEn](#) offers 10 water, energy, and organic food services and products that will allow high-end villa and luxury homeowners to live an energy-efficient, health-full and sustainable lifestyle.

The benefits of HydroEn include pure drinking and daily-use water, sustainable, eco-superior, solar power for energy and heating, and rainwater harvesting systems to save and re-use rainwater.

In addition to offering eco-friendly water and energy services, HydroEn also 'water enables' by offering services that allow users to grow farm-fresh veggies on their window sills or terraces using soilless farming. HydroEn-food solutions like aquaponics & hydroponics not only offer farm-fresh vegetables & greens but also slash water consumption by more than half.

Pesticide-laden fish and veggies thus become a thing of the past with HydroEn. So do contaminated drinking and daily-use water and power outages.

HydroEn enables an eco-habitat that saves electricity by using solar energy efficiently and utilising rainwater harvesting so you save and re-use rainwater that would have flown down the drain. This bouquet of luxe home solutions ensures cleaner-than-clean treated water across touchpoints, solar panel-powered homes, drought-resistant landscaping, pressure-full water, and more!

HydroEn thus is your best bet to actualize luxurious off-the-grid living, a concept gaining traction these days.
