

IR Supplies and Services Announces New Partnership with Creative Electron

Expanding World-class X-rays Solutions to Canadian Industries

Alberta, Edmonton, Apr 7, 2021 ([Issuewire.com](https://www.issuewire.com)) - IR Supplies and Services is pleased to announce its partnership with Creative Electron, an industry leader in X-ray systems. Together they offer organizations across Canada the tools to ensure inspections are done at the highest standard, a standard that results in quality output. X-ray cabinets manufactured by Creative Electron are offered in four main formats that can be customized to each client's needs.

"IR has always been focused on bringing premium brands to our clients," commented Robert Muschket, President of IR. "Providing clients with products that meet their needs is our priority. Since opening our Burlington location we have been able to expand our product line for clients who require solutions beyond what we have traditionally offered. The products developed by Creative Electron do just that—offer new solutions."

Bill Cardoso, founder, and CEO of Creative Electron expands on the Canadian-focused partnership. "At

Creative Electron, we pride ourselves on partnering with companies that are leaders in their fields. That's why we are so excited to join forces with IR, a team so well aligned with our vision of solving commercial and industrial challenges with first-in-class X-ray inspection tools. We see IR as an extension of our ability to actually understand and resolve customer problems rather than just selling boxes"

Creative Electron manufactures its X-ray inspection systems at its home office in San Marcos, California. This North American solution ensures quality controls are maintained at the highest level. It means that customizations can be easily executed with direct communications with the IR-CE team.

Ed Cabral, Director of Advanced Equipment, Training & Services at IR, the primary contact for businesses interested in discovering more about the Creative Electron cabinets, sees the partnership as a natural extension of the IR offering. "Today's inspection and manufacturing in countless industries are becoming more and more complex. It requires advanced technology that helps ensure processes result in maintaining high standards. Safety is paramount."

More about the Creative Electron cabinets can be found on the IR website at IRSS.ca.

About IR Supplies and Services: IR Supplies and Services has been a trusted source for NDT equipment in Canada since 2004. They supply top products and brands, perform non-destructive testing research, provide NDT training courses and perform maintenance, repair, and equipment calibrations. IR leverages both outside partners and internal capabilities to bring the most comprehensive and high-quality NDT equipment to clients.
