

Jaguar Security and Investigations: One Company, Total Protection

Texas, Houston, Apr 20, 2021 ([IssueWire.com](https://www.issuewire.com)) - Most people believe all security firms are very much alike – and in most cases, they’d be right. But when you take a closer look at Houston-based Jaguar Security and Investigations, it doesn’t take long before clear differences begin to emerge. The first – and most obvious – difference is the wide array of services offered by the company. The comprehensive list includes residential and commercial security systems, private investigations, special event security, personal protection, training, and much more.

“Since the very beginning of our firm in 2011, we’ve been responsive to the demands of our clients,” said Jaguar Security and Investigations President Maher Hussein. “Most prefer to deal with one company they trust rather than being forced to give out sensitive information to multiple entities. Over time, at their request, we began adding additional services as we grew. They have come to appreciate our high levels of discretion, experience, and flexibility, as well as the fact that the company never outsources any service.”

Jaguar Security and Investigations currently serves the entire state of Texas and recently expanded into Louisiana. Before year’s end, they will also have a presence in Illinois and California. “We are committed to opening offices wherever our clients need us on a regular basis,” explained Hussein. “We strive to provide a client experience that gives them an extra level of comfort that they’re dealing with a local company.”

The company, which currently has about 65 employees, thrives under the leadership of Hussein, who has been in or around the security and law enforcement industries for most of his life. He not only holds a Doctorate in Criminal Justice, but he also graduated from the Houston Police Academy and still holds a law enforcement license in Texas. “My studies and extensive experience have given me the tools to provide the products and services our clients want,” said Hussein. “I understand It takes a lot more than just a show of force to provide full-service protection. We’ve learned that each client has his or her own set of needs and we’re always flexible enough to accommodate them.”

Jaguar Security and Investigations is an acclaimed firm of security officers and private investigators. The company’s effective security and investigative solutions, along with the use of innovative technology, provide unmatched protection for the lives and property of its clients.
