

Kindda Trend is the New Viral! Read All About It

Singapore, Singapore, Apr 30, 2021 ([Issuewire.com](https://www.issuewire.com)) - Kindda is a Southeast Asian network that is sweeping the continent. It's a global platform for finding and showcasing talents to the rest of the world. The foundation of Kindda is to provide everyone with the chance to be rewarded. The concept of discovering and sharing talent has become so popular that a new phrase has been captured: Kindda Talents.

Everyone has a "Kindda Talent," regardless of who they are or where they live. It could be anything from downing a beer in under 15 seconds to tying a string with your tongue or the most recent office trick.

The app's heart is made up of Kindda Talents. The majority of the videos you'll come across when browsing through your newsfeed are about demonstrating an ability or a talent. As a result, Kindda is a place that allows everyone to find what they're good at and share it with the rest of the world.

Video Posts on Kindda

Making a video post on Kindda is ideal for fast, short videos that you can edit quickly and share with the world. Videos of any duration, beginning at 6 seconds, are encouraged by the app.

It is possible to make edits to a video after it has been taken, such as adding smilies, emojis, and choosing cute filters. It also allows you to rotate the video, use the flash (or not), and choose the speed at which you want the video to play. This entails making a timelapse video in slow motion or at a high speed.

Because not all videos are best captured while holding a phone, the timer allows you to put the phone down just in time to jump in front of the camera and take the image.

The Beauty Mode is another noteworthy feature. This is particularly useful when shooting selfie videos or videos with close-up shots of the face. This removes any flaws and gives the skin a calm, new, natural appearance.

Next Level Video Creation

Music transforms the content of every video and elevates it to a new level. Imagine being able to record a video of your talent and accompanying it with a song from your favorite movie soundtrack.

Kindda App Team

Kindda is made up of a multicultural team of people from all over the world who speak a variety of languages and have diverse lifestyles and backgrounds. Despite their differences, the team remains united by the app's core values. Kindda is a group of people who are passionate about what they do, committed to quality, and work well together.
