

Landoor strengthens its Medical Writing solution in response to clinical research and vaccines.

United Kingdom, London, Apr 20, 2021 ([IssueWire.com](https://www.issuewire.com)) - Landoor strengthens its [Medical Writing](#) solution in response to global efforts around clinical research and vaccines.

[Landoor Srl](#), a leading Italian provider of translation, localization, transcreation, medical writing, and interpreting services to the pharma, life sciences, medical devices, diagnostics, and healthcare sectors, today announced the strengthening of its medical writing solutions.

The medical writing solution has been strengthened in response to the growing demand coming from the pharmaceutical, scientific, clinical research, and medical diagnostics areas both in Europe and the UK. “The expanded medical writing solution compliments what we already have in place for the pharma, life science, medical, diagnostics and healthcare sectors, and means that we are able to offer a complete solution to our clients and the market and for companies operating in the Covid 19 vaccine and clinical research areas”, Adele Nardulli, Landoor CEO explains.

Landoor UK Country Manager Michael Ellis, said, “In the current climate of global medical innovation, it is important to stay close to our Clients and especially the UK market. Firstly, due to the UK scientific community being at the forefront of global efforts, clinical research, and vaccine trials to understand coronavirus (COVID-19) and secondly because of recent developments related to rapid Covid-19 tests and global distribution”.

“The writing solutions are aimed at supporting companies with their regulatory submissions and publications programs. Our mission is to facilitate the advance of cutting-edge medical research through the delivery of high-quality documentation, ” said Ellis.

The expansion of the medical writing solution now means that Landoor covers a wide range of medical subject areas including, infectious diseases and vaccines, dermatology and wound healing, diabetes, immune-oncology, neurological disorders, regulatory writing, medical communications, market access, and medical marketing.
