

Luxury Matchmaking Firm Opens Office in Boca Raton

Select Date Society

Luxury Matchmaking

Florida, Boca Raton, Apr 19, 2021 ([IssueWire.com](https://www.issuewire.com)) - Select Date Society, a luxury matchmaking firm, with clients nationwide, has opened a Boca Raton office. The office is located at 433 Plaza Real Suite 275, Boca Raton, FL 33432. The firm has five office locations throughout the United States and works with clients in most major metro areas.

Why the Boca Raton area? "We have a growing client base here in South Florida," says Amber Artis, CEO of Select Date Society. "We've had a presence in the area for a while, working with CEOs,

Physicians, and Executives here, so it makes sense for us to have a physical office here as well.”

If you are single and looking for love in South Florida, Select Date Society may be able to find you the perfect match, but they don’t accept everyone as a client. They work with clients who are emotionally and financially sound, and who they truly feel they can find success for. Sandra Myers, the firm’s President, says “I’m in it to win it! I always tell potential clients that I would rather disappoint them upfront by not taking them as a client than disappoint them later by taking them as a client and not finding them what they are looking for.”

Select Date Society is not a dating service. In fact, their goal is not to set clients up on great dates. The matchmakers at Select Date Society’s goal is to find their clients “the one!” They work with clients who are looking for an alternative to dating apps. Myers says, “Many of our clients are high profile individuals. They don’t feel comfortable putting their photos on dating websites, so they appreciate the discretion involved in hiring us.”

The Co-Founders of Select Date Society have combined experience of nearly fifty years, so they know what it takes to elevate successful singles to power couples. If you are interested in learning more about Select Date Society, call 877-344-9544 or visit www.selectdatesociety.com
