

New Update! Leawo Free Blu-ray Player for Mac V2.2.1 Revamped to Work on Macs with Apple M1 Chip

Leawo Software kicked off a brand-new version(V2.2.1) of Leawo Blu-ray Player for Mac recently and optimized certain functions to enhance playback capability.

Guangdong, Shenzhen, Apr 12, 2021 ([Issuewire.com](https://www.issuewire.com)) - Adhering to the core concept of user orientation and innovation, Leawo Software insists on improving its products all the time to provide a better user experience. A few days ago, the company launched [Leawo Free Blu-ray Player for Mac V2.2.1](#) and made it easier than ever for people to use with some new striking features optimized:

- Optimized to work on Mac computers with Apple M1 chip (macOS Rosetta required)
- Allowed keyboard arrow key shortcuts.
- Fixed loading failure issue of partial BDAV discs.
- Fixed playback crash/black-screen issues.
- Fixed other known bugs.

On November 11, 2020, Apple Inc. officially released its ARM-based computer chip M1 and got rave reviews for its incredible performance. M1 chip is deployed in the MacBook Air (M1, 2020), Mac mini (M1, 2020), and the MacBook Pro (13-inch, M1, 2020). Macs with the M1 chip have improved video quality with better noise reduction, expanded dynamic range, and advanced automatic white balance. Meanwhile, the low-power, high-efficiency media encoding and decoding engine provides outstanding performance and extends battery life. Since Leawo Blu-ray Player for Mac has upgraded to work on Macs with Apple M1 chip, it will definitely deliver enhanced image quality than ever. Intending to offer flexible usage, Leawo has made the keyboard arrow key shortcuts available in this latest version to help rewind, forward, and select desired chapters of the media file.

Being an unparalleled yet free media player tool on the market, Leawo Free Blu-ray Player for Mac is capable of playing high-quality video images and Blu-ray discs of region A, B, and C, and DVD discs from region 0 to 6 with its advanced decryption technology. For instance, it's able to [play region A Blu-ray in the UK](#) without hassle. Besides, Leawo Blu-ray Player for Mac is up to output various surround sounds like Dolby, DTS, etc. Since this software features a user-friendly interface, everyone could handle it and adjust playback settings by following the on-screen instructions. And to make Leawo Blu-ray Player for Mac work flawlessly, 1 GHz or above Intel Processor and at least 512MB RAM are required.

Price and Availability

As of now, Leawo Blu-ray Player for Mac is available in both free and premium versions, both of which are free to download and install. Compared to the free edition, the premium one has no limit to [convert Blu-ray/DVD discs to MKV file](#) (neither encoding nor decoding is involved) and everyone can purchase the premium version at a half-price on Leawo.org.
