

ODUWA COIN Launches blockchain optimization called IVIE

Plateau, Jos, Apr 2, 2021 ([Issuewire.com](https://www.issuewire.com)) - [Oduwa Coin](#), the first indigenous Cryptocurrency designed to empower people of African descent, is excited to announce the launch of its latest blockchain optimization called IVIE.

After three years of network operations, the developers of [OduwaCoin](#) have come up with a new line of on-chain executions for its fungible currency.

The blockchain upgrade is an addition to the existing Altcoin source code. Ivie will enable network improvement, staking algorithm, removal of bugs, optimized wallet, and much more.

The official launch schedule for rolling out the ODUWA network's latest optimization (IVIE) is the last week of April 2021.

Oduwa Core network contributors find it very important to keep its competitive culture alive within the blockchain framework. This upgraded version will highlight a critical step in the journey to deliver blockchain applications that directly connect to real people, particularly those informed by the members' community.

It is also important to note that miners and node operators will need to update their clients to the latest Daemon Version. However, holders of OWC in their wallets or exchange do not need to do anything for this upgrade.

Always bear in mind that "Your money should work for you and not against you, these are symbols of

kingdom power through trade dated back to the 14th century". -Bright Enabulele

As the great philosopher, Theodore Roosevelt said " Do what you can, with what you have, where you are." It is advisable not to miss out on ODUWA COIN MOVEMENT!
