Ofiyaa

Wales, Newport, Apr 26, 2021 ([Issuewire.com](https://www.issuewire.com)) - Everyone's work is inseparable from the computer, animation production, stocks, presentations, video editing... and many other tasks. A single-screen may not meet all user needs and affect their work efficiency. It is not that the user computer is not powerful enough, but that everyone has to do a lot of tasks. Users need multiple screens to build user own mobile workstation in a simple and convenient way.

OFIYAA is a multifunctional and portable dual-screen laptop monitor, which can quickly build a personal mobile workstation. Turning a computer into three, users can view the content on three screens at the same time and realize efficient multitasking. It is equipped with a USB/HDMI/Type-C interface to connect peripherals such as cameras, video devices, Android phones, etc. Wherever the user is, they can set up their own mobile workstation to start working efficiently.

OFIYAA comes with a built-in stand that can be adapted to the shell of 13-17 inch laptop computers, and each screen can be individually adjusted and set display parameters. It uses an 11.6-inch, 16:9 FHD high-definition display with a resolution of 1080P/60HZ (1920*1080P). Utilizing wide viewing angle technology, the user can clearly watch the screen content from multiple angles without distortion. And with a full rotation angle of 270°, users can find the best viewing angle for any situation, even if there are multiple people viewing from different angles at the same time.

OFIYAA is equipped with a USB/HDMI/Type-c*2 interface, which can not only connect to a computer but also to a mobile phone, turning the mobile phone into a computer. It can also be connected to digital devices such as digital cameras, game consoles, mice, keyboards, mobile hard drives, etc., making it an external screen for the device, which can meet various display needs in everyone's life. It is compact, convenient, and powerful!

OFIYAA is made of high-quality industrial materials and can withstand the wear and tear of carrying laptop computers. It has passed 10,000+ times repeated folding fatigue tests and can be used for at least 5 years or longer. Its weight is the only 1.33KG, and the size is 315*215*39MM, which is convenient to carry, and the user can set up their personal workstation at any time in a backpack. Fortunately, when users are at home or need to go out to work, the lightness and practicality of an extra monitor will provide enormous help.

The function of **OFIYAA** goes far beyond two monitors. The retail price of such a practical monitor is 499 US dollars, while the direct purchase price on Ofiyaa.net is reduced by 21% to only 395 US dollars.

Additional 5% off with Coupon Code (**OFIYAA**), User can buy it at 375.25 US dollars with Free Worldwide Shipping by DHL. Everyone should have a monitor like this! It will be an indispensable multifunctional display device in everyone's life!
