

Out in Revised Edition, Constance Porter's "Black in the United States" A Social Justice History/Timeline for Everyone

A Social Justice Must Read

Nearly everything that has been part of the black experience was sanctioned by laws. We have marched and responded to that "justice" without understanding much about it. Now it's time to know what the black history of Justice has been; and to understand why we are still marching.

The Timeline section goes back to the beginning; fills in untold history; and addresses misinformation.

This is the black history that is often overlooked. You deserve to know it.

As a 74 year old grandmother, I have lived through the Civil Rights Era. Wanting to understand more; I began this quest for history when I went back to college in the 80's. Watching the cycles of expansion and constriction of freedom for my people; I wanted to share my newfound understanding about the WHY's.

BLACK IN THE UNITED STATES

CONSTANCE W. PORTER

BLACK IN THE UNITED STATES

A Social Justice/ Timeline of the Black Experience
Here for 524 years (1492 - 2016)

CONSTANCE W. PORTER

Georgia, Marietta, Apr 3, 2021 (Issuewire.com) - This is a history that has rarely been reviewed. It's about Legislation and the results that impacted black freedoms, justice, and struggles. It is US history according to black people. What we don't know IS hurting us, and that history is being repeated. It took half a lifetime to research, and it is written in plain words. It is virtually impossible that you will NOT know more, more, and understand more than you did before. The timeline in part IV, covers five centuries, more than has been attempted before now. Commentary notes offer the significance of events. This is a much-needed RIGHT NOW experience.
