

Protective Masks Direct Announces Availability of FFP3 Face Masks

England, Royal Tunbridge Wells, Apr 21, 2021 ([Issuewire.com](https://www.issuewire.com)) - **Quick Summary:** *UK's leading face masks supplier Protective Masks Direct Ltd announces the availability of FFP3 Masks for next-day delivery in the UK mainland. Dial 01435 897501 to reach their customer care team and for buying FFP3 face masks.*

Protective Masks Direct Ltd, one of the leading face mask suppliers in the UK specialises in supplying protective workwear like respirators, [protective face mask](#), PPE, **dust face mask** and so used by healthcare experts.

In recent surveys and researches, countries like China, Italy, and Spain have the highest rate of people wearing face masks. Whilst, on the other hand, the UK is trailing behind with the lowest rate of people wearing face masks. Only 36% of people admitted that they wear face masks all the time; the ratio of wearing face masks in other countries is as high as 80%.

Still, there is no concrete proof for the mode of travel of the COVID-19 Virus, but the barrier has been found since COVID-19's inception. The barrier is- Face masks; there is no ultimate solution of COVID-19 other than face masks and social distancing. Some [dust face masks](#) like **FFP3 masks** are the most filtering masks. Ffp3 masks have a filtration rate of 99% and they can absorb any and every particle.

The mode of travel of COVID-19 is vague, but the medium is not. The virus easily enters the host body through Nose or mouth. The basic purpose of **protective face masks** is to cover the mouth and nose. At the same time, people must wear the face masks properly, covering their mouth and nose along by

sanitizing their hands at a regular interval; otherwise, it is a high risk of getting the COVID-19 virus.

Recently, Protective Masks Direct Ltd announced the availability of the ffp3 mask for an affordable price. The director of Protective Masks Direct Ltd, Mr. Matthew James David Lambert said “*We stock the full range of [FFP3 Masks](#) (P3 Masks) from all major brands including 3m FFP3 face masks, Alpha Solway, Moldex& JSP protective masks.*”

He also added, “*All our FFP3 disposable Dust Masks are CE Certified EN149:2001+A1:2009 & provide the highest level of respiratory protection available filtering particles as small as 0.3 microns (Virus) providing APF 20 protection (Highest Level) against highly toxic solid & liquid hazardous materials.*”

Disposable **dust masks** and **protective face masks** are now part of life. It is now inevitable without wearing face masks one can't be protective against COVID-19.
