

RoofSmart introduced Roof Walkway pads and Ladder Brace for Roof Protection.

RoofSmart is brand new to the roofing industry has introduced new Roof Protection products when any service person who is required to walk or work on any roof surface.

California, Simi Valley, Apr 9, 2021 ([IssueWire.com](https://www.IssueWire.com)) - RoofSmart is brand new to the roofing industry has introduced new Roof Protection products when any service person who is required to walk or work on any roof surface.

Ladder Brace

Any service person who is required to safely and securely attach a ladder to an elevated roof edge when the roof covering cannot be penetrated to secure the ladder to roof (i.e. tile, slate, or metal roofs), and wants to avoid damage to an outside gutter system needs [Ladder Stabiliser Brace](#) to dramatically improve ladder stability and safety for persons using the ladder.

Roofsmart Pad

Any service person who is required to walk or work on any roof surface whether it be low, moderate, or steep slope, with a roof made of tile, slate, or metal and to dramatically improve foot traffic stability and safety needs [Roof Traffic Pads](#) as a way to protect those roof surfaces from predictable foot traffic damage.

When a service person works on a roof they know it can be dangerous and just walking on it causes damage to tile and slate shingles. RoofSmartPads prevent workers from breaking any kind of tile, slate, or metal roofing and their Roof Walkway pads will secure your ladder keeping it from slipping or moving. Their special pads give you a secure footing on the roof and won't slip off even on steep-sloped roofs.

[RoofSmart](#) is brand new to the roofing industry. If you work on a roof you know it can be dangerous and just walking on it causes damage to tile and slate shingles. RoofSmart prevents workers from breaking any kind of tile, slate, or metal roofing and our pads will secure your ladder keeping it from slipping or moving. RoofSmart is patented and made in the USA. Our special pads give you a secure footing on the roof and won't slip off even on steep-sloped roofs.
