

Shoviv Software Releases Exchange Server Suite Version 20.11 – E-mail Migration Software for Windows

New York, New York City, Apr 22, 2021 ([IssueWire.com](https://www.issuewire.com)) - Shoviv Software is pleased to announce the release of Exchange Server Suite 20.11, which includes various new features and functionality and is now available in English on the Shoviv Software website.

The Exchange Server Suite from Shoviv Software is a \$499 tool that converts EDB archives, Outlook Stores, Office 365 mailboxes, and Live Exchange mailboxes to Office 365, Live Exchange, and Outlook PST/OST formats. All of this is followed by a high level of speed (Windows support) (Available in English).

Shoviv Exchange Server Suite is an Exchange, [Office 365 migration tool](#) that ensures users get the best possible results every time they use the Exchange Server Suite. It's as simple as providing expert-level service and comfort to users, and it can restore public folder and Archive mailboxes, as well as corrupted and inaccessible EDB files, in an instant!

Shoviv Exchange Server Suite can convert mailboxes/files to the common PST format, as well as migrate single or multiple source mailboxes to Office 365 or Office 365 mailboxes to Office 365 promptly. Users can save source mailbox items into different formats, such as EML, CAL, HTML, MSG UNICODE, VCard, EML, and so on, with only a few clicks.

Shoviv Exchange Server Suite is simple and easy to use. As a result, it allows the user to include/exclude source mailbox objects and filter messages based on message class date ranges. Users can use the item's search function to find newly added source files. It has several search criteria, including Subject, Email Item Form, CC, BCC, To, From, and Attachment name, etc. This feature also allows the user to conduct a multi-value quest. Users will be able to move the added source mailboxes to Live Exchange, Office 365 mailboxes, and Outlook profile stores using Shoviv Exchange Server Suite. With this function, you can use automated and manual mapping from the source mailbox to migrate exact data range items from a chosen message class. Shoviv Exchange Server Suite also helps users to manage data security when exporting additional source mailboxes to Live Exchange and Office 365.
