United Arab Emirates, Dubai, Apr 24, 2021 ([Issuewire.com](https://www.issuewire.com)) - The New Zapable – Instant Mobile App Builder

Create beautiful app designs for multiple industries.

This is a new mobile app builder that can create beautiful app designs for multiple industries. The beautiful app can be created for online coaching, personal trainers, realtors, cafes, restaurants, and many more.

There are 30 amazing states of the art features available inside this app builder. Like QR code scanning to get your app downloaded instantly, coupon codes, social media profiles, selling physical merchandise.

The new feature is zap digital. This zap digital will allow you to sell your digital products inside your own mobile app. Integrate the file in one click with your most common processor like Jvzoo, warrior plus, Clickbank, Paykickstart. Also, get sell access to membership sites by direct login in the app. Use the appointment counter if you are an online coach, send push notifications to the people who downloaded the app.

The best feature I want to mention here is to check out the new internet technology. Just by scanning

the QR code, the app can be installed on your client's phone instantly. Also, you can send the URL to the customers, and your app will be automatically installed on the user's phone with a single click.

Additional benefits:

Not only the Zapable app builder but they also provide done-for-you agency packages. There are 5 done for you lead generation videos for multiple industries. Also, it includes landing pages in multiple formats such as Clickfunnels, WordPress, Divi, Elementor, and many more.

It provides an email approach connecting scripts that you can copy and paste and send to potential clients. They share resources of the top 17 ways for your clients to download an app. There are many more "done for you" packages. Also, get amazing customer service.
