

The Newest Instant Messaging App Binix Chat Guarantees Full Security With Its Blockchain-Based Technology

United Kingdom, London, Apr 19, 2021 ([IssueWire.com](https://www.issuewire.com)) - Instant messaging apps have taken over the way humans communicate these days. No matter how popular they are, most of these apps fail to provide absolute security to their users. Binix Chat introduces a whole new world of digital text-based communication using blockchain technology with its instant messaging and social app. The app comes with the finest technologies, offering a safe and secure way of staying connected. The users can enjoy a secure and private messaging experience with their blockchain technology-based app.

The app is not limited to messaging. It offers different features that are extremely valuable in the market. The users can turn on their location in settings and become visible to other users. They can even share their real-time location to others anytime they want. People can even video call their family and friends and experience crystal-clear visual experiences. Binix Chat has the ability to give tough competition to elite instant messaging apps with its high-quality services and features.

Bitcoin is the future of all kinds of peer-to-peer digital money transactions all over the world. The more advanced today's technology becomes, the harder it gets to protect cryptocurrency. Binix Chat understands the need for security while dealing with Bitcoin. That is why the app features a crypto wallet feature that lets users safely store all their funds inside their devices. The wallet provides a direct connection to Bitcoin blockchain so that the users have full control over their funds. The open-source product offers the highest level of security when it comes to managing BTC.

Binix Chat is a new instant messaging app that offers encrypted messaging services using advanced blockchain technology. The company is working towards the goal of taking the app on a global level becoming the number one choice of the users. Their crypto wallet function makes them stand out in the crowd. Developed by an international team of experts managed by Binix PLC, the app is swiftly climbing high on the popularity chart. To know more, visit them at <http://binix.chat>.
