FREE CONSULTATION

Florida, Miami, Apr 18, 2021 (Issuewire.com) - **Walkway Management of South Florida** has officially begun serving South Florida as an official franchisee of the Walkway Management Group, Inc. based out of Dallas, Texas as the industry leader in walkway auditing technology, services, training, and treatments. The franchisee will provide service to Palm Beach County, Broward, and Miami Dade County.

Walkway Management of South Florida provides:

- Certified BOT-3000e Operators
- Slip Test Services and Legal Reports showing ANSI compliance.
- Remediation Services
- AIA Continued Education Course
- Remote and Local Monitoring
- Lab Research and Testing
- Traction Enhancing Treatments and Floor Safety Programs

This “one-stop-shop” walkway safety solutions provider is an industry pioneer making walkway safety “mainstream” by providing cost-effective solutions applicable to every walkway in America. **Walkway Management of South Florida’s** BOT-3000E tribometer, traction-enhancing treatments, lab testing, and certified training meet all the relevant **ANSI, ASTM, and ISO standards**. All **WMG** products and processes are the results of thorough scientific research conducted in partnership with leading universities in Europe and the United States of America. **WMG’s** strategic research partnership with the **University of North Texas, College of Engineering** ensures continuous progress in the science of pedestrian safety.

“Strict adherence to standards and continued investment in scientific research provides the peace of mind needed when advising and servicing our valued customers.” -Peter Ermish, CEO

Serving customer’s worldwide, WMG offers value to professionals across the following industries: Airports & Hanger’s facility managers, Chemical Formulators, Factories & Warehouses, Floor Type Manufacturers, Forensic Investigators, Government & Military, Grocery & Retail Stores, Hospitals, Hotels & Casinos, Independent Floor Safety Consultants, Insurance Companies, Janitorial & Sanitary Service Companies, National Testing Lab, Polished Concrete Contractors, Restaurants, Safety & Corporate Risk Managers, Schools, Tile & Floors Covering Distributors and Manufacturers

About Walkway Management Group, Inc.

About Regan Scientific Instruments BOT-3000E Tribometer:

The BOT-3000E Tribometer, from Regan Scientific Instruments, is a highly precise, digital instrument capable of measuring the dynamic and static coefficient of friction (COF) of walkway surfaces in the lab and in the field. It is the only device qualified for use with ANSI A326.3 “American National Standard Test Method for Measuring Dynamic Coefficient of Friction of Hard Surface Flooring Materials” released in April 2017. It meets the requirements of ASTM 2508 for the validation and certification of walkway tribometers, as tested by an independent laboratory. Measuring walkway slip resistance with the BOT-3000E per the ANSI A326.3 method allows you to recognize and remove slip and fall hazards, in compliance with the Standard of Care called for in OSHA Section 5(a)(1), General Duty Clause. The BOT-3000E and ANSI 326.3 are the result of published research conducted in the United States and Germany and represent the sound scientific methodology required to meet the “Daubert” rule of evidence in United States federal and state courts. The user-friendly interface of the BOT-3000E allows you to regularly and easily monitor your facility’s walkways and gauge the effectiveness of your efforts to maintain slip-resistant and hazard-free floors. The Regan Scientific Instruments BOT-3000E Tribometer is officially distributed by Walkway Management Group, Inc.
