

Attention Cat Lovers: There Is A New Cat (\$CATZ) On The Crypto Block

Despite The Market Turmoil CatzCoin (\$CATZ) Has Already Pledged \$250K+ For Cat Shelters In Charitable Donations

New South Wales, Sydney, May 27, 2021 ([Issuewire.com](https://www.issuewire.com)) - Attention Cat Lovers:

There Is A New Cat (\$CATZ) On The Crypto Block

Despite The Market Turmoil CatzCoin (\$CATZ) Has Already Pledged \$250K+ For Cat Shelters In Charitable Donations

CATZ is a fast-growing community token with an ambition to overtake Dogecoin as the top community coin. They will be donating 5% of the total coin supply to charities that support cats over the next 30 months.

CatzCoin (\$CATZ) distinguishes itself from other tokens. The CatzCoin journey is on a solid decentralized finance roadmap. There is no pre-sale, no external investor and no pre-mine.

The initial project liquidity has been locked on UniCrypt, the leading liquidity locking service provider. Everything about their project is transparent and verifiable on Binance Smart Chain ("BSC") Scan.

"We started CatzCoin because we imagined a world where all cat lovers, regardless of location, can create a community with strong bonds that transcend time and distance. We imagined a different, decentralized future where cat lovers from all over the world would come together to achieve something bigger than themselves."

- William, Co-Founder & Chief Catz

The core team is based in Sydney, Australia, and has a strong mix of software, crypto development, finance, marketing and sales experience. They have a clear plan and an exciting roadmap. They intend to build the best decentralized ecosystem (DECO) around \$CATZ and the CatzNation.

The CatzTeam is also developing a decentralized exchange (DEX) CatzSwap, a new reward token \$FISHZ, an NFT trading platform CatzTrading, among other DeFi initiatives.

Furthermore, their CatzCharity program means that the equivalent dollar value of five per cent of the total coin supply will be donated to the preferred charities of \$CATZ holders over the next 30 months.

Each year, approximately 2.7 million cats are killed across the world because shelters are low on capacity and there aren't enough adoptive homes. In the US alone, there are an estimated 70 million homeless cats. Rescuing these cats will be an enormous mission for CatzCoin, through the collective efforts of its CatzNation and the potential of DeFi technology, will be the key to complete this mission.

"We wanted to create a community of cat-lovers that can rapidly prosper and grow into a leading global community under the endless potential of DeFi technology, to ensure there is no cat or kitten that will go abandoned, unloved and neglected."

- David, Co-Founder & Chief Growth Catz

Notes to the Editors:

About CatzCoin:

CatzCoin (\$CATZ) is a community token with a vision. Our mission is two-fold. First, to unite cat fans around the world, economically empowering them in the flourishing market of decentralized finance (DeFi); and second, to support abandoned or homeless cats. The CatzCoin Project aims to ensure all our furry friends are protected and happy in a loving home. CatzCoin is rapidly becoming the center of interest within the global community. It is more than just a community token – it is also a DeFi product, where CatzSwap, CatzFarm, CatzTrading, and other initiatives will be founded.
